

PLEASED WITH COUNCIL

TRADES AND LABOR COUNCIL OF POLED TO GAS CONTRACT

A Report Which Announces the Action of Those of the Aldermen Who are Dis-... Other Matters Pertaining to the Welfare of the City's Working Element

The Trades and Labor Council still nearly midnight last night and municipal discussion caused several scenes that would rival the hottest at the city hall.

In the absence of President Glocking, who is ill, Mr. A. W. Holmes, vice-president, occupied the chair at the meeting.

Del. James O'Leary reported on behalf of the Typographical Union that all candidates for municipal honors had been asked by circular to show their sympathy with labor's cause by signing that the union label be on all their cards and envelopes.

In the municipal committee's report, presented by Secretary Dower, the following points were made with reference to the gas question, after referring to the purchase of the gas plant at Pennsylvania: "The members of the council are also to be commended for the decision arrived at by the council to fight against the gas company, so successfully begun by Mr. Johnston, to a higher court. It is believed that the bill will be endorsed by every right-thinking taxpayer."

Mr. Hubbard's resolution regarding handling over the water works or other public franchises to any private company was also discussed.

While they could not endorse all the proposals of the Citizens' Civic Reform Committee, yet many good suggestions had been made.

Del. Dower drew attention to the fact that one of the principals of a public school was taking up a subscription among the pupils to procure a piano for use during the closing exercises. While he did not object to having the piano purchased, he pointed out the principal being allowed to take an action which put the poor pupils at a disadvantage compared with the rest of it. It was hard for a poor child to be compelled to say he or she could not subscribe.

Mr. Hubbard was thanked for having carried out the resolution which provided a copy of the Engineer's report on the total expenditure to be \$4,250,000.

The council struck out of the committee's report their proposition that the Mayor should require to be approved by the council or ex-almere, believing that it would not be giving an opportunity to the ratepayers to choose the men whom they wished to elect.

The legislative committee's report, presented by Secretary O'Donoghue, dealt with the importation of Bernard boys, and the importation of Bernard boys, and the importation of Bernard boys.

Mr. J. T. Mills endeavored to have Ald. Shaw's notice of motion providing for procuring power to any matter to the people as well as money bylaws endorsed by the council. There was a lively discussion upon it, the feeling evidently being that the action proposed should be an endorsement of Ald. Shaw's motion.

Mr. J. T. Mills endeavored to have Ald. Shaw's notice of motion providing for procuring power to any matter to the people as well as money bylaws endorsed by the council.

Mr. J. T. Mills endeavored to have Ald. Shaw's notice of motion providing for procuring power to any matter to the people as well as money bylaws endorsed by the council.

MR. LAURIER'S PRESCOTT MEETINGS

A Large and Enthusiastic Gathering at Plantagenet, Referred to as "The Free Trade Lunch"

Plantagenet, Ont., Dec. 6.—The meeting held here today in honor of the visit of the Hon. Mr. Laurier was the largest attended of any political gathering ever held in this township. The Town Hall, which is a large building, was judged by the committee to be too small, and the factory at the river was an admirable substitute.

The meeting was held in the open air in front of the factory. The speaker was accompanied by the following members of Parliament, namely: Messrs. Proulx and Ewart.

Mr. Laurier proclaimed the Liberal policy on the same lines as at Vancouver. He said that he was free trade and that the country was ready to accept the free trade policy.

He said that he was free trade and that the country was ready to accept the free trade policy. He said that he was free trade and that the country was ready to accept the free trade policy.

He said that he was free trade and that the country was ready to accept the free trade policy. He said that he was free trade and that the country was ready to accept the free trade policy.

He said that he was free trade and that the country was ready to accept the free trade policy. He said that he was free trade and that the country was ready to accept the free trade policy.

He said that he was free trade and that the country was ready to accept the free trade policy. He said that he was free trade and that the country was ready to accept the free trade policy.

INDIANS AT FOOTBALL

Wooden Balls are Used, and the Play is Over a Three-Hour Course—While Villages Assemble to Witness the Contest and Stake Their Personal Effects on the Result

There are ways and ways of playing football, and while the highest type of football evolution may be represented by the long-haired, truck-padded, ear and nose-protected collegians of today, who smash and crush the daylight out of each other in superhuman efforts to lodge an inflated pigskin within a certain goal, there are other games of football played annually within the limits of the United States that require in a modified way almost as much endurance, pluck and skill to lead to victory.

The Papago Indians of Southwestern Arizona and Northern Sonora, Mexico, have a game of football all their own, which has been handed down generation after generation from times far more remote than the Spanish conquerors of Mexico.

It was discovered that the Southwest Indian was the original promoter of the game which causes the most excitement to yell themselves hoarse on eastern grids.

The game is played on a rectangular field of wood by kicking and throwing the ball, which is covered with a thick tanned animal, mottled-brown anatomy of the deer.

The Papagos play the game with solid wooden balls, which are made of the wood of the mesquite tree, and are rolled into shape, and finally rounded to heavy, smooth, mottled-brown anatomy of the deer.

The game is played on a rectangular field of wood by kicking and throwing the ball, which is covered with a thick tanned animal, mottled-brown anatomy of the deer.
