HATCH CHICKENS BY STEAM
With the Improved Excelsior Incubator.
Simple, Perfect, Self-Regulating. Thousands in successful operation. Guaranteed to hatch a larger percentage of fertile eggs at less cost than any other hatcher. Lowest priced first-class hatcher made in the Dominion.
GEO. H. STAHL, Quincy, Ill.

CONSUMPTION CURED.
An old physician, retired from practice, had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma and all Throat and Lung Affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints. Having tested its wonderful curative powers in thousands of cases, and desiring to relieve human suffering, I will send free of charge to all who wish it, this recipe, in German, French or English, with full directions for preparing and using. Sent by mail, by addressing, with stamp, naming this paper

APPLY TO **JOSEPH BEAUBIEN,** 30 St. James, Montreal.

The only one on the market, which the horses can run without their walk being bridged.

LA CANADIENNE Perpetual Press (Patent and improved).

It affords us great pleasure to have it known that the improvements brought to our hay press "La Canadienne" have made it superior to all other horizontal presses working in the shape of half a circle. The fuller's course is 33 inches, that is from 6 to 9 inches longer than in any other horizontal press, which gives a wider opening to put the hay in and more speediness. Three men will do more work with our press "La Canadienne" than with any other press in the shape of a half circle, while it is much less tiresome for the horses. The materials employed are of the first quality, with the exception of two pieces of chilled cast iron, all the other parts are of steel and malleable cast iron.

We guarantee our press to work at the rate of 10 to 13 tons of hay every day without the horses being tired.

We manufacture four sizes of presses:
14 x 18 16 x 18 16 x 20 16 x 22

We will send this press for trial to any responsible party. Write for our Catalogue and list of prices.

The thrashing machine represented in the above engraving is our vibrating machine. It has a run of 24 inches long with teeth in steel guaranteed so that they can bend without breaking as the norway The iron work that support the drills is all in wrought iron which is very advantageous and economical as any blacksmith can make it, so that all long delays are avoided. The sieve of our vibrating machine is longer and wider than all the other machines of the same kind manufactured in Canada. This new shape facilitates the cleaning of the grain and the sieve is less exposed to spread its contents one-side. We give seven passes with this sieve. The horse power runs on cast iron rails, all the shafts of the bridge are in steel and measure 6 of an inch which represents half a line of a larger size than those employed by the other manufacturers. All the shafts in the separator, the sieve and the horse power are in steel. We never use any iron shaft. Our machine is acknowledged to be the easiest to run and the one which lasts the longest. Write for a catalogue and list of prices. We also manufacture a Canvas Separator with Improved Railroad Horse Power, Railroad Upright Hay Press, Rod Upright Hay Press; Straw Cutter No. 9, 11, 13; Spring Harrows, 16 teeth; a Washing Machine patented May 1892. We want active and responsible agents in all the localities where we have none yet. Any farmer shall find it an economy and be certain to have the most improved machine in applying to us. We allow a special discount for orders sent by mail.
