Force and Matter; OR PRINCIPLES OF THE NATURAL ORDER OF THE UNIVERSE, with a System of Morality based thereon. By Prof. Ludwig Büchner, M. D. A scientific and rationalistic work of great merit and value. Translated from the 15th German edition, revised and enlarged by the author, and reprinted from the fourth English edition. One volume, crown 8vo, 414 pp., with portrait. Extra silk cloth, \$1.00; half calf, \$3.00.

"Büchner's volume is so powerful an exposition of the thorough-going scientific theory of the universe that it may be confidently recommended to all who wish to become acquainted with present-day Materialism. The earlier chapters, dealing with the nature and indestructibility of force and matter, are sufficiently trenchant to arouse curiosity, while the facts adduced to prove the affinity of matter to life, as well as the scientific hypothesis than ever the difficulty of holding a vitalistic hypothesis. The unbiased reader will sympathize with Büchner's protest against the degrading conceptions of matter which are so common, as well as against the incoherent habit of implying an immaterial principle of life as existing between matter and force, matter and spirit, body and soul. Natural laws are everywhere the same, the properties of matter are everywhere alike; wherever we find evidence of outside government or intervention. After treating of the successive periods of the life of the earth and the development of life, Büchner gives the fitness of things in nature is explained from the point of view of science, while the latter half of the book is occupied with an examination of the various phenomena of mind, consciousness, and soul, and the probabilities of their continued existence after death. The final chapter, on morality, treats the problem of human relations on the evolutionary line, which Mr. Spencer has rendered familiar."—*The Literary Guide, London.*

Life of Jesus. By ERNEST RENAN, with many valuable illustrations. 400 pp., crown 8vo, paper, 50c.; cloth, 75 cents.

Although educated as a Catholic priest, Renan, from study and observation, became a philosopher. From his religious training he had learned to admire and respect the character and teaching of Jesus of Nazareth, but his good sense and reason led him to disbelieve in the supernatural origin of the "Son of Mary." His reasons for this disbelief—

this want of faith—are as follows, and are given in his own words:

"None of the miracles with which the old histories are filled took place under scientific conditions. Observation, which has never once been falsified, teaches us that miracles never happen but in times and countries in which they are believed, and before physicians disposed to believe them. No miracle ever occurred in the presence of men capable of testing its miraculous character. Neither common people nor men of the world are able to do this. It requires great presence of mind and habits of scientific research. In our days, have we not seen almost all respectable people desert of the masses of fools or people illusions? Marvellous facts, attested by a whole population of small towns, have, thanks to a few sceptical travellers, been exploded. If it is proved that no contemporary miracle will bear inquiry, is it not probable that the miracles of the past, which have all been performed in popular gatherings, would equally present this shape of illusion, if it were possible to criticise them in detail?"

Man in the Past, Present AND FUTURE. By Prof. Ludwig Büchner. It describes Man as "a being not put upon the earth accidentally by an arbitrary act, but produced in harmony with the earth's nature, and belonging to it as do the flowers and fruits to the tree which bears them." Cloth, \$1.00.
