the author have so far failed to reveal any great amount of grace or rhythm in the modern dance as usually presented. Therefore, if we would discover the truth we must look to other sources for the cause of its popularity. To the keen observer it would appear that the "Dance Habit" is closely related to the "Mac. Hall Habit." But so far the reason for their popularity is, like the currents of the upper strata of the atmosphere, only dimly understood. It would seem advisable then for any persons interested in this particular phase of the subject to do a little original investigation and experimentation in order that they may be in a position to discuss the question intelligently, should it arise on any future occasion.

E. L. EATON, '20

Note—The author wishes to acknowledge with gratitude the assistance received from "American Medicine," in his description of the cause of Habit.

It has been recommended that suitable chaperones be provided to accompany certain freshmen when they go down town. We are all agreed that these children should not be permitted to visit the wild, wild Village of Guelph without adequate protection. That they are a harmless, innocent lot may be gathered from the statement made in the Guelph Herald of November 8th. Never mind, boys, in a couple of years you will have come to the age of discernment, and at that time, if the war is over, you may demonstrate to the people of Guelph that you have the old O. A. C. blood in you.

A \$35.00 BEAUTY

It's a man's watch—finest gold - filled case, very thin model. The movement is a Ryrie special, 17 jewel, ad justed, patent regulator, Breguet hair-spring, gilt or white dial.

It's such a beauty, that if we couldn't secure any more of them, we would be almost (not quite) sorry to see them go.

Guaranteed, of course.

RYRIE BROS.
