

arm moderately against the leg of the cow. She cannot then kick, or if she attempts it, by raising her foot, the milker will be ready to ward off and protect herself and pail from any sad consequences. Thus guarded, let them make as brisk work of milking as possible—treating the cow gently, and withdrawing all the milk faithfully, and there will be a chance for the security of two good things—a good milker and a good cow.—*Boston Cultivator.*

WHAT A DOLLAR WILL PURCHASE IN ILLINOIS.—A subscriber at Little Woods, says:—"I have at last succeeded in apprehending an Eastern Bill preambulating our third currency state. With us, the enclosed is equivalent to three bushels of wheat, eight bushels of corn, or twelve of oats—or 1 cwt. of beef or pork, a yearling steer, or a hecatomb of hogs. Will it pay for one year's subscription to the Cultivator, for mauger my resolutions of economy and retrenchment, I find I cannot do without it." Another correspondent in Illinois, says:—"Blessed as we are with a rich soil, we cannot make money by farming, at present prices—wheat 31 to 35 cents—corn 8 to 9 cents—pork \$1.00 to \$1.60 per 100 lbs. and no money even at these low prices."

PRICES IN INDIANA.—A letter from a correspondent in Daviess county, says:—"Pork is selling here at from \$1.00 to \$2.00 per 100 lbs.—wheat 37½ cents per bushel—corn 12½ cents, and other produce at similar rates."

PRICES IN MISSOURI.—Our agent at Hannibal says:—"Wheat is only 25 cents cash per bushel—corn, 12½ cents—pork, \$1.50 per 100 lbs., and stock cheaper."

CHOLIC IN HORSES.—I was lately told by a gentleman of Prince George County, that a tea-cup full of the spirits of turpentine would give instant relief to horses laboring under this disorder. He added that on one occasion all the oxen of two of his carts were hoven—that is, as you know, suddenly swollen by the generation of gas in the stomach, from eating green food. The overseer expected all would die, when our informant ordered a tea-cup full of the spirits of turpentine, dissolved in oil, to be given to each. The relief was in every case instantaneous and effectual, almost before he could have thought there was time to swallow. Such facts should always be communicated for wide diffusion and preservation in agricultural journals.

THE AMERICAN AGRICULTURIST.

Published monthly, each number containing 32 pages, royal octavo.

TERMS—One Dollar per year in advance; single numbers, Ten Cents; three copies for Two Dollars; eight copies for Five Dollars.

Each number of the Agriculturist contains but One sheet, subject to newspaper postage only, which is one cent in the State, or within 100 miles of its publication, and one and a half cents, if over 100 miles, without the State.

Advertisements will be inserted at One Dollar, if not exceeding twelve lines, and in the same proportion, if exceeding that number.

Remit through Postmasters, as the law allows.

Editors of Newspapers noticing the numbers of this work monthly, or advertising it, will be furnished a copy gratis, upon sending such notice to this office.

Vol. 1 of *The American Agriculturist*, with table of contents complete, for sale at \$1; handsomely bound in cloth, \$1 25 each. It is a neat and tasteful book, and makes a handsome premium for distribution with Agricultural Societies, to which, when several copies are ordered, a liberal discount will be made.

To prevent confusion, all letters merely ordering this work, or enclosing money for subscriptions, should be addressed to Saxton & Miles, 205 Broadway, post-paid or franked by the Postmaster.

Communications for publication to be directed to the Editor, 205 Broadway, New York.

This cheap paper contains some very good figures of extra fine Stock.—*ED. COL. FAR.*

Blaikie's Portable Threshing Machine

Worked with two, three, or four horses at pleasure.

THE SUBSCRIBER begs to intimate to the Agricultural community throughout Nova Scotia, and the adjoining Colonies, that he is prepared to receive orders for making *Threshing Machines*, either portable or stationary. He believes that he is justified in stating that his machines are equal in speed, if superior to any now in use in the Colonies, or in the United States. With two horses, his machine will thresh 25 bushels of wheat per hour, and a fourth more for every additional horse, when the price is in fair working condition. With two horses it will thresh bushels of oats per hour, and a fourth more for every additional horse. The horses move in a circle of 25 feet in diameter at rate of 2½ to 3 miles per hour, and can work during the fall without fatigue. The portable machines can be removed from one barn to another with ease, are easily erected and put in operation, and are rarely subject to get out of order. From the price at which they are made, and the rapid sale they have since received, wherever they have been tried, he has reason to believe that they only require to be known to come into extensive use.

Letters addressed (post paid or free) to the manufacturer, or the editor of the *Mechanic & Farmer*, will receive every attention.

THOMAS BLAIKIE

Green Hill, West River, February 1.

CERTIFICATES.

This is to certify that in December, 1841, I purchased one of Mr. Thomas Blaikie's *Stationary Threshing Machines*, and since that time by the great saving of time and labour resulting from the use of it, it has amply repaid me for the use of it. I therefore confidently recommend these machines to every farmer who may require such an article; and will venture to assure a person that if they purchase one they will never have reason to regret it, as an unprofitable investment of capital.

GEORGE McDONALD

West River, January, 1843.

Having worked for some time with one of Mr. Blaikie's *Threshing Machines*, with moving horse power, would recommend it as a superior article, and are certain, that no farmer could make a better investment than to supply himself with a machine of this kind.

SAMUEL FRASER,
JOHN FRASER.

New Glasgow, January 3, 1843.

I have had Messrs. Fraser's *Threshing Machine*, made by Thomas Blaikie, threshing for me two or three days, and found it to surpass my expectations. It does the work well, and thrives clean; and I would recommend it as a very superior article, both as regards saving of labour and grain.

B. L. KIRKPATRICK

New Glasgow, January 3, 1843.

Having witnessed the *Threshing Apparatus*, made by Mr. Thomas Blaikie, in full operation, I give it as my decided opinion that it far exceeds, in usefulness, and saving of labour, any other of a similar nature which has come under my observation, and that it is preferable to any other kind used in the Province.

JAMES CARMICHAEL

New Glasgow, January 3, 1843

"THE COLONIAL FARMER,"
