

cine millionaire. At the Montreal Dispensary it is a common thing to attend people for charity who have spent twenty-five dollars on worthless but highly advertised patent medicines. That the threat of the latter to withdraw their advertisements from the daily papers may soon be put into effect is our fervent hope. If they do not, the doctors may be obliged to withdraw their prescriptions from the retail druggists in order to save themselves from starvation. Nothing in the above remarks of course applies to the legitimate advertising of the manufacturing pharmacists in the medical journals; they are a help instead of a hindrance to the profession.

### BOOK NOTICES.

**ESSENTIALS OF PHYSIOLOGY.** By H. A. Hare, M. D., Professor of Therapeutics and Materia Medica in the Jefferson Medical College of Philadelphia; Physician to St. Agnes' Hospital and to the Medical Dispensary of the Children's Hospital; Laureate of the Royal Academy of Medicine in Belgium, of the Medical Society of London, etc.; Secretary of the Convention for the Revision of the Pharmacopœia, 1890. Numerous illustrations. Third edition, revised and enlarged. Price, cloth, \$1.00; interleaved for notes, \$1.25.

In the third edition of Hare's Physiology all the more difficult points of the study of the nervous system have been elucidated. As the work now appears it cannot fail to merit the appreciation of the overworked student.

**INTERNATIONAL CLINICS: A Quarterly of Clinical Lectures on Medicine, Surgery, Gynecology, Pediatrics, Neurology, Dermatology, Laryngology, Ophthalmology, and Otology,** by Professors and Lecturers in the Leading Medical Colleges of the United States, Great Britain, and Canada. Edited by John M. Keating, M. D., Philadelphia, Consulting Physician for Diseases of Women to St. Agnes' Hospital, Philadelphia; Editor, "Cyclopædia of the Diseases of Children." J. P. Crozer Griffith, M.D., Philadelphia, Clinical Professor of Diseases of Children in the University of Pennsylvania; Professor of Clinical Medicine in the Philadelphia Polyclinic. J. Mitchell Bruce, M.D., F.R.C.P., London, England, Physician and Lecturer on Therapeutics at the Charing Cross Hospital. David W. Finlay, M.D., F.R.C.P., London, England, Physician to the Middlesex Hospital, and to the Royal Hospital for Diseases of the chest; Lecturer on Clinical Medicine in the Middlesex Hospital Medical School. July, 1891. Philadelphia: J. B. Lippincott Company.

**SYLLABUS OF OBSTETRICAL LECTURES IN THE MEDICAL DEPARTMENT, UNIVERSITY OF PENNSYLVANIA.** By Richard C. Norris, A. M., M. D., Demonstrator on Obstetrics in the University of Pennsylvania. Price, cloth, interleaved for notes, \$2 net.

The *New York Medical Record* of April 19, 1890, referring to this book, says: "This modest little work is so far superior to others on the same subject that we take pleasure in calling attention briefly to its excellent features. Small as it is, it covers the subject thoroughly, and will prove invaluable to both the student and the practitioner as a means for fixing in a clear and concise form the knowledge derived from a perusal of the larger text books. The author deserves great credit for the manner in which he has performed his work. He has introduced a number of valuable hints which would only occur to one who was himself an experienced teacher of obstetrics. The subject-matter is clear, forcible, and modern. We are especially pleased with the portion devoted to the practical duties of the accoucheur, care of the child, etc. The paragraphs on antiseptics are admirable; there is no doubtful tone in the directions given. No details are regarded as unimportant; no minor matters omitted. We venture to say that even the old practitioner will find useful hints in this direction which he cannot afford to despise."

**ANNUAL OF THE UNIVERSAL MEDICAL SCIENCES.** A yearly report of the progress of the General Sanitary Sciences throughout the world. Edited by Charles E. Sajous, M. D., and Seventy Associate Editors, assisted by over two hundred Corresponding Editors, Collaborators and Correspondents. Illustrated with Chromo-Lithographs, Engravings and Maps. In five large volumes. Price, \$18.00. 1891, F. A. Davis, Publisher, Philadelphia, New York, Chicago, Atlanta and London. Agencies: Sydney, N.S.W.; Cape Town, So. Africa.

In reviewing this work last year we summed up our opinion of it with the one word marvellous. This year our opinion is the same only more so. An improvement this year is the reference numbers at the end of each volume instead of only at the end of the fifth. We have not been able to read the whole work but in order to obtain an idea of its scope one has only to turn to any particular subject, such as Section F., Vol. II. Diseases of the uterus, by Mundé and Wells. Here will be found a synopsis of every article of any importance on any disease of the uterus published in any language during the past year, with the name of the writer, the name of the journal, where published, and the date. Anyone who wishes to keep himself informed of what has been written may read in a few hours' time what would require many weeks, or even months of research to find. This will be the more readily understood when we state that no less than 995 medical journals are referred to besides nearly 200 more volumes of transactions of societies. We can hardly understand how so many men, so high up in their respective departments can be induced even for a large sum of money, to devote so much time to the work as it undoubtedly requires. Speaking of the sharp currence, for instance, in the short space of three lines no less than sixteen elaborate articles are referred to, which anyone specially interested can read at length in the respective journals. The editor seems to have secured, as we have already said, the ablest writers, not only in America, but
