The coming together of such a tremendously enthusiastic gathering as that which filled St. Andrew's Hall on Saturday night would seem to place beyond peradventure the election of Messrs. E. F. Clarke and E. B. Osler in West Toronto. The chief feature of the meeting was the address delivered the meeting was the address delivered by the candidate who has just returned from across the water. Mr. Oslers effort was one of the strongest and most powerfully conclusive of the campaign. The good news he brought back from England as to how Canada and her resources are viewed over there simply electrified his hearers, who also cheered when the candidate prophesied

An Eye-Opener from the Chairman.
The Chairman, in opening the meetling, observed that this was one of the
extraordinary moments in the country's
history. As a business man he was
speaking to business men—for every
workingman was a business man. (Applause.) He then proceeded to say that
an interregnum in business—a period
of doubt—was ruinous to the commercial community. He had, the other
day, asked Mr. Laurier if a Premier
coming into power in June could at
come formulate his policy, and Mr.
Laurier fall and the others on had defithing was impossible.

If the Liberals, he went on, had definitely declared their policy, it would not have been so bad, but as it was if that party were returned to power the time that would elapse between the elections and February or March next would be a period of doubt disastrous to business. He had heard no declaration of policy from the Liberals, All he had heard was the expression of a mystic, uncertain, undefined hope that if they got into power no harm would be done. (Laughter.) The largest interests he had in the world were here at home, and it was important to his of the trade policy and to free trade as they were in dread of the benefits of the trade policy and concluded with a prophecy of victory for Mr. Maclean on the 23rd.

Alt. Bubbard's Live werds.

Ald. Hubbard was very warmly received and his remarks kept the audience in the best of humor. He dwelt largely on Mr. Maclean's abilities and good political record, showing up the solution, presented by the Toronto Board of Trade, which was the first on the list, and, according to Mr. Chamberlain, which contained the germ of the principle of reciprocal trade, the meeting was almost unanimously in its support. (Applause.)

Even the people of England, with the example of France, Germany and the United States before them, are realizing that protection is not so bad for a country after all. (Applause.) Now, the National Policy has not, perhaps, realized to every one all that was noped for it. It was not the fault of the policy.

Where the Fault is.

The great decline in prices that began in 1879 and 1880 has continued until a lower figure, especially in foodstuffs, was reached than ever before.
