# ADOPT DIGNIFIED COURSE

But Congress May Be Led Into Controversy Over President's Message.

WASHINGTON, Dec. 13.—Both houses of congress are counting upon concluding the ante-Christmas holiday work of the session during the present week. The date of the adjourn-

portation. The Canadian Pacific has half a dozen giant snowplows at work on its lines, between Montreal, Smith's Falls and Quebec, and the other railways are kept equally busy.

In Montreal it is costing the city more than \$1000 an hour to keep the streets open, without counting the cost to the street railway company.

The McGill Observatory records show a snowfall of over fourteen inches, an unusually heavy one for this season of the year.

Present week. The date of the adjock ment most probably will fall on the Cist inst.

It is expected that both houses will deal during the week with the question of the paragraph in the president's message relating to the secret service. The committee appointed will probably present its report to the house early in the week and in case a resolution dealing with the subject is presented it will be acted upon before the dispersion of the house for the holidays. The present program in the holidays. The present program in the senate, so far as the senate has a pro senate, so far as the senate has a program, is to have introduced a resolution similar to that passed by the house, which authorized a committee to deal with the question and report

back.
It is not anticipated that the question will be discussed to any extent in either body, as all senators and members of both parties feel that as they are dealing with the president, a dignified course should be pursued. If however, a controversy should be started in either body, it probably
