The column of the Moon's Southing is also the time of High

Taking all things into consideration the Indian Corn Crop is one of the most important that is raised in this Province—the selection of the soil and preparing it for the crop is of importance. If you have an old tough meadow or pasture that you design for corn, plough it in November, just before the ground freezes up—lay the ground over smooth, to the depth of 8 inches, following with a subsoil plough, and going down 6 or 8 inches lower. Then make it smooth with the roller, and let it lie till spring—when it is sufficiently dry, harrow it with a fine-tooth
