LABOR WORLD

News and Views of the Ever Advancing Army of Workers

The most thoroughly organized skilled tradesmen in Germany are the printers.

Five thousand United Mine Workers in Scranton, Pa., celebrated John Mitchell's birthday October 29.

During August, 3,681 artisans and laborers were employed on co-operative works in New Zealand.

It is said that the United States Steel Corporation has divided into 69,933 persons and wages to 28,000.

The Workingmen's Club, of Hartford, Conn., makes a feature of giving relations to capitalism as well as to labor leaders.

The new British Blue Book gives the average weekly wages of fifteen skilled trades at \$10.50 in London and \$13.75 in New York.

Within a year more than 2,000 skilled workmen have left the French silk factories of Roubaix and Turoing for the United States.

A gigantic labor combination will be made in the alliance of the Western Federation of Miners and the United Mine Workers of America.

The Woodworkers are to hold several open meetings in the near future for the purpose of getting those outside the union on the inside and generally strengthening their position throughout the city.

The strike of the 500 employees of the 45 dye-works in Chicago, Ill., has been settled, both sides making concessions.

Overtures of peace made to the National Metal Trades Association by the International Association of Machinists have been rejected, and officials of the latter threaten to call out 60,000 men in the United States to force the making of an agreement.

There are several colored unions in Richmond, Va., which are affiliated with a recently organized central body. The tobacco workers have two organizations, numbering over 800 members.

The 4,000 employees of the Lehigh, Pa., Coal & Navigation Company who were suspended because they celebrated John Mitchell day instead of working, are holding meetings and are talking of a general strike being ordered in the Lanher Creek Valley.

The N. S. W. Minister for Railways claims that the state-owned tramway system there is the most modern and the cheapest that human intelligence has been able to devise.

The local trade unions of the city are taking a pretty lively interest in the coming municipal contest. For the mayor's chair there appears to be but one opinion and that is that Mayor Ure-uhart should receive their undivided support because of his record during the past year.

The local branch of the Bookbinders' Union elected the following officers on Saturday: President, C. H. Hurst; Secretary, J. Prichard; Recording Secretary, W. Glocking; Financial Secretary, T. Barber; Treasurer, R. Glocking; Guide, R. Ferrier; Statistician, J. Somerville; Sergeant-at-Arms, T. E. Hodgson; Auditors, W. Brooks, G. Legier, H. Bromley. The girls engaged in the binderies are also organized, and recently held a very successful open meeting.

The Toronto Musical Protective Association and Local 149 R. F. and M. at their last meeting enrolled another batch of new members. The roll of the musical union at the present time contains about 500 names, among whom are to be found the best musicians of the city.

The new constitution was ordered to be amended, and the new seals of prices will be prepared at the next meeting. There will be a warm contest for president when the election time comes, the candidates being Messrs. John Waldron and Thomas Williams, Sr.

CO-OPERATION.

Editor Toller: I was much interested in that article on co-operation by W. B. Prescott, that appeared in your issue of Dec. 4th, especially in the wonderful triumphs of co-operation in Oldham, Lancashire.

I am afraid that, as W. B. Prescott says, it is because we cannot unite, plod away at the small things that we have failed at the greater things, and with better opportunities, are far behind Oldham and New Zealand. I am afraid that the root of the matter requires strengthening within us, so would you find room for the words of St. Paul on this subject, with the accompanying commentary by Albert Barnes.

"Be of the same mind one toward another. Mind not high things, but condescend to men of low estate.—Romans xii, 16. This passage has been variously interpreted. 'Enter into each other's circumstances, in order to see how you would yourself feel?' (Chrysostom). 'Be agreed in your opinions and views.' (Stuart) compare Philippians ii, 2, 4, 'that ye be like-minded, having the same love, being of one accord, of one mind.' 'Look not every man on his own things, but every man also on the things of others.' A literal translation of the Greek will give somewhat a different sense. Think of that in regard, or seek after, the same thing for each other; that is, what you regard or seek for yourself, seek also for your

brethren. Do not have divided interests; do not be pursuing different ends and aims; do not indulge counter plans and purposes; and do not seek honors or offices for yourself which you do not seek for your brethren, so that you may still regard yourselves as brethren on a level, and aim at the same object. 'Mind not high things,' Greek—not thinking of high things; that is, not seeking them, aspiring after societies, to court the society or the honors of the men in an elevated rank of life. Christians were commonly of the poorer ranks, and they were to seek their companions and joys there, and not to aspire to the society of the great and the rich.—Albert Barnes.

Say, now, brothers, is not that just about the way those Oldham boys must have developed, their co-operatives?

Do you know any of Toronto's successful business men? Are they living on the streets where they started twenty-five years ago? Well, we won't blame them for themselves, our fault, but all the same, St. Paul's climate is more favorable to the growth of co-operatives. St. Paul taught the genuine gospel. So, brothers all, let our Labor Party stand by the victims of the present shop. Let us put forth our greatest efforts for those who toil the hardest, the longest hours, and the lowest wages. I don't suppose we can do anything for the victim of the present shop, unless we could surround them with such encouraging examples as Oldham does, surely it would inspire such hope and ambition that they would rise to energy and activity.

John Ruskin, who has been called the father of the language, says that Holy, Holy, means Helpful, Helpful, Helpful; he also says: 'Co-operation is the law of Heaven; competition is the law of Hell.' 'The ability to share in the need of labor legislation just now more than there is for co-operative mills in Toronto. But in working out the development of our Labor Party, let us be loyal and true to the highest and the most triumphant principles of co-operation. J.H.R.

WHAT ARE YOU GOING TO DO ABOUT IT?

The strikes, injunctions and actions for damages against our trades unions! Dollar bills don't grow on trees, and a sure thing that which man has his head buried in his own nosebag. Let us face the question like intelligent men, and get down to ways and means.

I can see only one chance in the union, and don't tie it up as we have in the past. It was all right to toll and sweat (if you had the chance) to go to union, pay your dues and dissent strikes, boycotts, Labor Day demonstrations and baby shows, but if we begin to talk about how much wealth was created by our toll, who got it, how they got it, and what they did with it—if we talked about the various leaks through which our wages slipped away so fast, and how we could make our money last longer and accomplish more, we were sat on, or greeted with cries of "Politics," "Shut up," "Give us a song." Come, now, brothers, don't be afraid of brain exercise. It is by scheming that our opponents have got ahead of us, and by the same methods we must overtake them.

Direct legislation, the Hare-Spence system of voting, and women franchise would immediately give us the upper hand and open the gates for all progressive legislation. But it can only come by united action. It is too late in the day to talk about encouraging individual enterprise and protecting every man in the front of his own labor. Dr. Chown, preaching in Broadway Tabernacle on the occasion of the Trades Union Campaign for the coming parliamentary and municipal elections, that would be a total of \$2 per man, and let us ask ourselves a question. New Zealand trades unions assess themselves to the rate of one penny per man, and get a greater lot from \$80 to \$100; painters and bricklayers' laborers not much less. How much will the Iron Moulders' Union have to pay by the time they have got through with the Canada Foundry Co. About twelve years ago the New Zealand trades unions organized for political action. Say they have had 20 levies for each of the last twelve years, and that would be a total of \$2 per man, and let us ask ourselves a question. New Zealand trades unions assess themselves to the rate of one penny per man, and get a greater lot from \$80 to \$100; painters and bricklayers' laborers not much less. How much will the Iron Moulders' Union have to pay by the time they have got through with the Canada Foundry Co. About twelve years ago the New Zealand trades unions organized for political action. Say they have had 20 levies for each of the last twelve years, and that would be a total of \$2 per man, and let us ask ourselves a question. New Zealand trades unions assess themselves to the rate of one penny per man, and get a greater lot from \$80 to \$100; painters and bricklayers' laborers not much less. How much will the Iron Moulders' Union have to pay by the time they have got through with the Canada Foundry Co. About twelve years ago the New Zealand trades unions organized for political action.
