And will restore to health constitutions enfeebled and broken down by Fevers, Fever and Ague, Scrofula, and other diseases; and will purify the blood, increase the appetite, and give strength and tone to the whole system; and are also adapted to Diseases peculiar to Females, such as Weakness, Irregularities, etc., and is the best remedy to use for Children that are subject to Worms. *These Bitters are Purely Vegetable*, and are composed of Berbs, Roots and Extracts, which are in extensive use by physicians and in domestic practice, and are found in our own country, the product of our hills and valleys, "Nature's own cure." Acting, as they do, upon the STOMACH, LIVER and BOWELS, by removing all Morbid Secretions, thereby PURIFYING THE BLOOD and invigorating the DIGESTIVE ORGANS, they not only cure diseases that already exist, but also fortify the system against the attacks of disease. They are, therefore, of incalculable value in preventing Fevers of all kinds, and all Epidemic Diseases. Nurses, and those who are in attendance upon the sick, should always use these Bitters. All can use them with benefit, whether sick or well, especially in the Spring of the year, and during hot weather.

These Bitters have cured hundreds of cases of Sick-Headache and Liver Complaint, many of which were of ten, fifteen, and even twenty years' standing.

The extensive and increased sale of these Bitters has induced the proprietors to enter largely into their manufacture, with the intention of putting them within the reach of all who may wish to avail themselves of a valuable medicine.

None are so poor but they can obtain them, as they are
