A NOTED BUT UNTITLED WOMAN. (From the Boston Globe)

Mesers, Editors :-The above is a good likeness of Mrs. Lydia E. Pinkham, of Lynn, Mass., who above all other human beings may be truthfully called the "Dear Friend of Woman," as some of her correspondents love to call her. She is zealously devoted to her work, which is the outcome of a life-study, and is obliged to keep six lady assistants, to help her answer the large correspondence which daily pours in upon her, each bearing its special burden of suffering, or joy at release from it. Her Vegetable Compound is a medicine for good and not evil purposes. I have personally investigated it and am satisfied of the truth of this.

On account of its proven merits, it is recon and prescribed by the best physicians in the country. One says: "It works like a charm and saves much pain. It will cure entirely the worst form of falling of the uterus, Loucorrheez, irregular and painful Menstruation, all Ovarian Troubles, Inflammation and Ulceration, Floodings, all Displacements and the con-sequent spinal weakness, and is especially adapted to the Change of Life."

It permeates every portion of the system, and gives new life and vigor. It removes faintness, flatulency, destroys all craving for stimulants, and relieves weakness of the stomach. It cures Bloating, Headaches, Nervous Prostration, General Debility, Sleeplessness, Depression and Indigestion. That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will at all times, and under all circumstances, act in harmony with the law that governs the female system.

It costs only \$1. per bottle or six for \$5., and is sold by druggists. Any advice required as to special cases, and the names of many who have been restored to perfect health by the use of the Vegetulie Compound, can be obtained by addressing Mrs. P., with stamp for reply,

at her home in Lynn, Mass.

For Kidney Complaint of efficer sex this compound is

unsurpassed as abundant testimonials show.

"Mrs. Pinkham's Liver Pills," says one writer, "are the best in the world for the cure of Constipation, Biliousness and Torpidity of the liver. Her Blood Purifier works wonders in its special line and bids (air to equal the Compound to its popularity. All must respect her as an Angel of Mercy whose sole

ambition is to do good to others. Phile " bhia, Pa.

are never imitated or counterfeited. This is positive proof that the remedy imitated is of the highest value. As soon as it had been beef breed, being of large size and early matested and proved by the whole world that turity. Besides being profitable for either Hop Bitters was the purest, best and most butter or cheese making, the cows, when dried valuable family medicine on earth, many imitations sprung up and began to steal the notices in which the press and people of the country had expressed the merits of H. B., and in every way trying to induce suffering invalids to use their stuff instead, expecting to make money on the credit and good name of H. B. Many others started nostrums put up in similar style to H. B., with variously devised names in which the word "Hop" or "Hops" were used in a way to induce people to believe they were the same as Hop Bitters. All such pretended remedies or cures, no matter what their style or name is, and especially those with the word "Hop" or "Hops" in their name or in any way connected with them or their name, are imitations or coun-terieits. Beware of them. Touch none of them: Use nothing but genuine Rop Bitters, with a bunch or cluster of green Hops on the white label. Trust nothing elses. Druggists and dealers are warned against dealing in imitations or counterfeits.

KIDNEY DISEASE,

KIDNEY

SKIMMED MILK FOR HENS AND / ORIOKENS.

There is nothing better for laying hens in the spring than milk, after the cream has been taken off. We have tried it several seasons with complete success. With the milk given fresh from the dairy room every day, the fowls will need no other drink, and it will supply everything required in the way of animal food. The pullets feed with milk and corn, and a mixture of corn meal and milk, through the cold weather, have given an abundant supply of eggs. Wheat bran is also a good article to mix with the milk. It is better to give the mixture a boiling and to feed it in a warm state, but this is not necessary. We have also found the milk one of the best kinds of diet for young chickens soon after they come from the nest, to promote their health and rapid growth. Indian meal, ground coarse, and scalded with milk, is a perfect teed for them. As they grow older, grass, cabbage, or onions may be chopped fine and added to the Taily rations. portion of the milk on dairy farms, usually going to the pig trough, may be diverted to the chicken coop with great advantage. Eggs are worth twenty-five cents a dozen, and poultry twenty cents a pound, when pork brings but ten cents a pound .- American Agriculturist for May.

THE APIARY IN APRIL AND MAY.

From the losses last winter, many will wish to buy bees, and transfer them into their empty hives. First turn the old hive bottom up, after smoking the bees sufficient to quiet them. This work should be done at noon on a warm day when the bees are active. Place above the hive a box, and so wrap the line of junction with a sheet that no bees can escape. Bap on the hive (with a hammer or stick) for fifteen minutes. The bees in this time will fill with honey and cluster in the box above the hive. Set the new hive filled either with frames of comb, or wired "foundation" on the old stand, where the boxhive stood, and shake the bees in front of it. They will quickly enter and take possession. The box-hive is set aside for three or four weeks, when all the brood will have hatched out. The bees may now be drummed out as before and added to the others. Unless the bees can gather food, the bees in the new hive must be given combs containing honey or fed, until there is opportunity for them to gather sufficient stores for their needs. If it should turn cold the old box hive must be put into a warm room, else the brood will become chilled, and fail to hatch. If it is warm, and there tare no flowers from which the bees can gather, the old box hive must be closed, or robbers may enter and carry off honey.

After all the bees are removed the second time from the old hive, it is knocked to pieces, the combs cut out, melted into wax, and sold or worked up into " foundation."

In case a queen has been reared in the box hive, where the brood has been hatching, by the young bees, she may be killed, if seen, or left to the old queen, who will destroy her.—

ANIMAL EXERCISE.

The exercise of animals ensures a superior quality of flesh. If not, how is it that the beef of Scotch highland and Weish mountain black cattle is more delicate and of a finer flavor than that of those reared and fed on lowlands, or in yards and stalls, and brings two cents more per pound in the market It is chiefly because they take much more exercise while reared and fattened, which acts upon the muscles, and increases their tenderness and juiciness. The mutton of the Welsh mountain sheep is so superior to all others, even the famous Southdown, that it is all engaged beforehand by private parties at a high price, and is never offered to the public in market. It is true that the pasture they feed on has a sort of aromatic taste, and assists in helping to flavor the mutton; but still we think the exercise an important factor in contributing to its superiority. The venison of wild deer is much more gamy than of those which are kept tame in large herds in gentlemen's parks, and the flavor of wild grouse, partridges and quali is much preferred to that of domestic fowls, on account of its gamy quality. Poultry, when closely confined to fatten, instead of distributing the fat in small streaks through the fissh, lay it up in lumps on different parts of the body, leaving the flesh flabby and comparatively tasteless. We contend for giving all animals plenty of fresh air and a reasonable amount of exercise, in addition to wholesome food and pure water. Then they thrive well and turn out a good and profitable quality of meat.—American Agriculturist for May.

Renewer." \$1. BREED CHARACTERISTICS OF CATTLE.

The Jerseys and Guernseys excel in richness of milk and fine butter qualities. The latter are larger than the former. Herefords are not large milkers, but the milk is rich. The bulls make good crosses on native cows, and the steers fatten rapidly. The Ayrebires are especially true of a family medicine, and it is good milkers, and will do well on short pastures. Their milk is better for cheese than for butter. Shorthorns are eminently the off, fatten remarkably easy, and make beef of prime quality. The bulls are handsome and excellent to grade up native stock. The Devons are quite, similar to the Herefords in respect to milking qualities, but smaller in size, and of a deep red color. As working oxen, they are celebrated, being muscular and setive. They are thrifty growers, and mature early; their beef is of prime quality. The Polied cattle are profitable for beef, especially a superior prairies of the West, and their meat is superior or west. erior in quality. The cows' milk is rich, but it is not produced in very great quantities. The Holsteins or Dutch cattle are noted for excellent milking qualities, coupled with the capabilities of making good beef. Their peouliar markings make them attractive to the eye .- American Agriculturist for May.

THE EFFECTS OF THE COERCION AND CRIME LAWS.

DUBLIN, April 24.-In Ireland the practical commentary on Coercion and Crime Laws has been the election of political suspects to a membership of Parliament. They have now extended the principle to other representative bodies and other classes of alleged oftenders against the law. Mr. John McCarthy, a merchant of Loughres, and a gentleman of high social repute in the locality, but who is charged with complicity in the murder of Constable Linton at Loughrea, has been returned as a Guardian for the division of Loughres, in the place of a land agent named J. Toole, who represented the division for many years. Several divisions in the Loughrea Union, for which landed proprietors and their agents sht for many years, have changed hands. Twenty-two Nationalist Guardians occupy seats in the Loughres Board room at present.
