

TIDE TABLE.

The time of High Water at Charlottetown is given to the nearest minute local mean time for each day, once in 24 hours. For the time of the intervening tide it is sufficient to take the mean of the next adjacent tides preceding and following the tide required, changing a. m. to p. m. or the reverse, thus: for the morning tide of the 10th June, take—

June 9th,	6h. 29m. p. m.
" 10th,	7h. 27m. "
	2)13h. 56m.
June 10th,	6h. 58m. a. m.
