

## TEACHERS AND PUPILS

Our business is wholly to cater to the wants of teachers and senior students. All the snap, vim and enterprise in our make-up will be given to aid teachers and pupils, not only through the columns of **THE ENTRANCE**, but in every other way possible. Already we have placed before teachers and pupils certain school helps, and we have others which will be announced from time to time. Our latest is a pamphlet of the

### Entrance Examination Papers

set during the past five years. This pamphlet is issued in the same form and size as **THE ENTRANCE**, and all papers are arranged in groups, that is, the papers on each subject are found together.

For seven years as Principal of schools in Essex county we enjoyed a record of which we shall always feel proud, and we state frankly that much of our success in those years was due to the use made of examination papers in the class. All our pupils were always supplied with back papers, and thus became familiar with the style and scope of the questions given. We shall have more to say later, on the use we made of these papers in our classes.

To make it possible for pupils, as well as teachers, to have these examination papers, we have ordered large quantities, and are thus enabled to supply the pamphlet at 15 cents, or at 10 cents when ordered in clubs of two or more.
