encouraged and that these vacant lands
be cultivated and made productive. Let
us take no action which will hamper and
discourage dairying.

The Province of Quebec is the greatest
butter-producing province of the Domini-
on. It produces 35.8 per cent. of all the
creamery butter made in Canada. It is
the cheapest province to live in. Increased
production of butter tends to bring
down the high cost of living. It will be
the greatest good for the greatest number
to keep oleomargarine out of Canada and
encourage a greater production of butter.
Who really wants oleomargarine in Can-
ada, except the manufacturer and retail
vendor, who makes money out of it?
The Canadian workmen, who are as good
as the best, want the best in the way of
food. The average man would not eat
oleomargarine if he knew what he was
getting. Therefore why continue the
means of deception? Let us be loyal
patriotic Canadians, and in the interests
of Canada and the Canadian people
banish oleomargarine forever from our
markets.—D'ARCY SCOTT, Secretary and
General Counsel, National Dairy Council
of Canada.

Collection of Annual Agri-
cultural Statistics 1920.

Amongst the statistical reforms ac-
complished or inaugurated by the Do-
minion Bureau of Statistics, established
in 1918, none is of more importance
than that which is concerned with agri-
culture, the leading industry of Canada.
To farmers it is of supreme importance to
know what areas are being devoted to
particular crops in their own and other
countries, how such crops are being
extended or withdrawn from cultivation
and what is the volume of production
in one season as compared with another.
They should, by means of accurate in-
formation on these points, be able to
form their own judgment as to the local
crops likely to prove most remunerative.
Similarly, a knowledge of the numbers
of farm live stock, and whether these are
increasing or decreasing from year to
year, is important to all dealers; and is at
least of equal importance to breeders and
producers.

During the past three years the annual
agricultural statistics of the Dominion
have been based upon returns of areas
sown and numbers of live stock on the
farm, collected from individual farmers
in the month of June. This information
is obtained by means of a simple card-
board schedule, which is distributed to
farmers through the agency of the rural
school teachers and children. The cards,
when completed, are first sent to the
Provincial Government, which, after
having them sorted into counties or
districts, transmits them to the Dominion
Bureau of Statistics at Ottawa for final
compilation into totals by adding ma-
chinery.

As schedules are now being distributed
for the collection of this year's returns
of the areas sown and the numbers of
farm animals, it is desirable to call the
serious attention of farmers to the duty
of filling up the simple schedule required.
Any farmer who does not receive a card
before the end of June should apply
for one either to the school teacher in
his school district, to the Agricultural
Department of his province, or to the
Dominion Bureau of Statistics, Ottawa.

It is the aim of the Dominion and
Provincial statistical authorities to secure
an annual return from every individual
farmer in the Dominion. The issue
of trustworthy annual agricultural statis-
tics is important for all classes of interests
in Canada, but to none is it of greater
importance than to farmers themselves,
who otherwise carry on their industry in
the dark and are liable to be victimized by
unscrupulous traders. No individual re-
turns are published, and the information
collected is not used in any way for taxa-
tion purposes. It is confidently expected
that as farmers become better acquainted
with the system organized for their benefit
and realize the practical value to them-
selves of accurate agricultural statistics
there will be a continuous increase
in the proportion of returns. Mean-
while, it should be remembered that
whatever degree or error may attach
to the figures issued is attributable to the
estimate that has to be made from the
actual returns.—E. H. Godfrey, Dominion
Bureau of Statistics, Ottawa.

Remington UMC

Duck Shooting is Coming!

Are you ready for the rousing days when duck shooting opens? Keen eyes, steady hands, good judgment and a Remington UMC pump gun will bag the ducks as fast as they come.

The "old reliable" pump gun gives you six shots quick! Bottom ejection, solid breech, hammerless, safe, its velvet smooth slide action is swift and sure.

For shells—of course, Arrow and Nitro Club Wet-proof, Steel-lined shells will get results.

AutoStrop SAFETY RAZOR

Edge Before Stropping (Magnified)

Edge After Stropping (Magnified)

ALL safety razors seem alike because of the similarity in size and appearance. As regards the AutoStrop Razor, however, the resemblance ends there. Its peculiar and additional advantage is that, without being larger than any other safety razor, it combines within itself a self-stropping feature that enables the user to keep the blade sharp without taking anything apart. It thus prevents dull blades and the expense of buying new ones.

You may not be interested in economy of blades, but surely you want a good shave and that is only possible with a stropped blade.

Any dealer will demonstrate the AutoStrop Razor to you, guarantee satisfaction, or refund of purchase price. Only \$5.00—complete with stropp and twelve blades in an attractive assortment of cases.

AutoStrop Safety Razor Co., Limited
