

HAD WEAK and DIZZ YSPELLS COULD NOT SLEEP AT NIGHT.

People all over this land toss night after night on a sleepless pillow, and do not close their eyes in the refreshing slumber that comes to those whose heart and nerves are right.

The sleeplessness comes entirely from a derangement of either the heart or nerves, or both, but whatever the cause Milburn's Heart and Nerve Pills offer the blessing of sound refreshing slumber. They do this by their invigorating effect on the heart and nerves, and will tone up the whole system to a perfect condition.

Mrs. A. E. Martell, Rockdale, N.S., writes:—"I was troubled for a long time with my heart, had weak and dizzy spells, could not sleep, and would have to sit up the greater part of the night, and it was impossible for me to lie on my left side. At last I got a box of Milburn's Heart and Nerve Pills, and they did me so much good I got another, and after taking it I could lie on my left side, and sleep as well as before I was taken sick. They are the best medicine I ever heard of for heart or nerve trouble."

Price 50 cents per box, or 3 boxes for \$1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

WOOL

Let us know how much you will have this season, and the breed, that we may quote you our prices. Don't fail to write us before you sell.

Choice Yorkshire Boars

Ready for service. Write:

H. G. BENFIELD, Woodstock, Ontario

QUESTIONS AND ANSWERS. Miscellaneous.

TREES AT BOUNDARY.

How close to a line fence could a man plant trees? Is there any law to stop a man from setting trees right up to the line fence? What steps would have to be taken to have them removed?

Ontario.

Ans.—He may plant trees anywhere on his own land; but if he should plant them close to the line fence he would be taking the risk of having his neighbour cut away overhanging branches—which the neighbour would have the legal right to do.

DUCKS DIE.

What is the cause of young ducks dying? We had quite a bit of trouble with them last year. They would get crippled one day and be dead the next. They had plenty of water. Would it be the feed? I fed shorts and bran, and sometimes middlings and bran, but at the first for a little while I feed bread soaked in water, the same as for chickens. Will someone tell me the best way to feed young ducks?

J. S.

Ans.—For the first two weeks of their lives, young ducks should be kept out of the sun or rain. Although they are water birds, they cannot stand much rain. Shade is also necessary. There is a chance that your ducks got too much sun or wet. Sometimes the gizzard becomes jammed with sand, which is fatal. Corn-meal, bran, oatmeal, or shorts, or low-grade flour and animal meal, all mixed, make a good mash for ducks. From 25 to 40 per cent. green food is necessary.

SCALE ON OLEANDER—LEAF HOPPERS.

1. Please find inclosed a leaf of an oleander which has some brown scale or shell on under side of leaf, which I think hinders the growth of the plant. When washed off with soap and water it will return again in a short time. Am going to try formaldehyde and water, but wish to know the name, also the best remedy to keep them off. One lady put turpentine on the leaves with a soft rag, but the leaves died, although the plants are living.

2. What is the name of the insects inclosed in envelope? Have heard of the Buffalo moth, and wish to know if they are the same. If so, what is the best means to get rid of them? I have destroyed all I have seen, which was about a dozen.

3. What is the best method to keep off the small white or light fly that comes on the leaves of rose bushes? Tobacco (smoke) I have tried, but they soon gather again, and it is difficult to get the plug tobacco to burn.

M. J.

Ans.—1. The oleander leaf has upon it some Lecanium scales, which are commonly found attacking greenhouse and window plants. The only effective remedy, where a few plants are concerned, is to scrape them off with an old tooth or nail brush, dipped from time to time in strong soapuds. This operation will require to be repeated occasionally, as some of the eggs and minute young scales would probably escape. By keeping a lookout from time to time the insects may be controlled. Turpentine would certainly destroy the foliage, and, if it reached the stems, would cause the death of the plant.

2. The small insects inclosed in the envelope are the Buffalo beetle, an account of which will be found in another column at as early a date as space permits.

3. The little white insects on rose leaves are evidently leaf hoppers, which belong to the bug tribe, and suck the juices of the plants they attack. They are extremely lively, and, therefore, difficult to control. Syringing the under side of the leaves with strong soapuds, or a decoction made by soaking coarse tobacco in boiling water, will destroy them. Kerosene emulsion is also used with good effect. Another plan is to tack a sheet of sticky fly paper on a piece of board, then hold it near the bush and tap the twigs lightly so as to cause the hoppers to fly off. Numbers of them will be caught on the sticky surface.

A Favorite with Women

An Agent of ours, who previously sold other makes of separators, says: "The reason I asked for your agency was because

EMPIRE Cream Separators

seem to be the favorite with the women of this locality. Before I had Empires for sale, I've known women to go to a town ten miles farther on to get them."

Empire Separators well merit their popularity with women. They run so easily, children think it's fun to operate them.

They don't spatter oil. And the anti-splash steel supply can keep the milk from slopping out. They don't make a muss. They are clean-running machines.

The few, simple skimming de-

vices are easy to clean. Empires are sanitary separators.

They are not complicated in construction. Nothing puzzling about them. They are simple machines. Easy to put together. Easy to understand.

Surely madam, you would like to realize the pleasure and profit there is in owning a really good separator, therefore ask our agent to let you have one for Free Trial. This will place you under no obligation to buy.

You may have a copy of our latest catalog, too, if you'll just write our nearest office.
