

CHRISTIAN FELLOWSHIP.

1 Our souls by love together knit, Cemented, mix'd in one; One hope, one mind, one heart, one voice, 'Tis heaven on earth begun; Our hearts did burn when Jesus spake, And glow'd with sacred fire; He stopp'd, and talk'd, and fed, and bless'd And fill'd the enlarged desire.

2 We're soldiers fighting for our God, Let trembling cowardice fly; We'll stand unshaken, firm and fix'd, For Christ to live and die; Let devils rage, and hell assail, We'll fight our passage through; Let foes unite, and friends desert, We'll seize the crown our due.—Chorus.

3 The little cloud increases still, The heavens are big with rain; We haste to catch the teeming shower, And all its moisture drain; A rill, a stream, a torrent flows, But from the mighty flood; O shake the nations, sweep the earth, Till all proclaim Thee God.—Chorus.

4 And when Thou mak'st Thy jewels up, And set'st Thy starry crown; When all Thy sparkling gems shall shine, Proclaim'd by Thee thine own;—May we, a little band of love, Be sinners saved by grace; From glory into glory changed, Behold Thee face to face.—Chorus.

Selected. W. E. MILLER.

PHEBE CAREY'S DYING HYMN.

1 Earth, with its dark and dreadful ills, Recedes and fades away; Lift up your heads, ye heavenly hills,— Ye gates of death, give way!

2 My soul is full of whispered song; My blindness is my sight; The shadows that I feared so long Are all alive with light.

3 The while my pulses faintly beat, My faith doth so abound; I feel grow firm beneath my feet The green immortal ground.

4 That faith to me a carriage gives, Low as the grave to go; I know that my Redeemer lives— That I shall live, I know.

5 The palace walls I almost see, Where dwells my Lord and King; O Grant me where is Thy victory? O Death! where is Thy sting?

From James Cochran, Esq., Patenteo of Cochran's Patent Spinning Wheel. Church St., Corn wallis, N.S., February 27, 1879.

My brother had for more than eighteen months suffered with distressing cough. One side of his breast had shrunk or fallen in, his strength was fast failing and was total appearance far gone in Consumption, when he commenced the use of Graham's Pain Eradicator under the proprietor's direction. The result of its use was most satisfactory and the cure rapid. He has remained in the enjoyment of good health since using this medicine more than fifteen years ago. We have many times since then proven its efficacy in other forms of disease and pain, and have reason to believe that it has no equal.

JAMES COCHRAN. Herring Cove, Halifax, N.S., May 24, 1879.

I had for nearly two years suffered severely with pain in my breast and side, resulting from severe cough that was supposed to be Consumption. For a long time I had a lump in the lower part of my right side, which increased in size and painfulness until one night my sufferings were so great that it was feared that I could not live until morning, when Graham's Pain Eradicator was tried both internally and externally, it gave immediate relief, and completely reduced the swelling or lump and drove it all away. For pains in the breast and side as well as for other forms of pain I have never seen its equal.

MICHAEL DELUOHRY. The evil consequences resulting from impure blood are beyond human calculation, so are the vast sums expended in worthless remedies. Parsons' Purgative Pills make new rich blood, and taken one a night for three months, will change the blood in the entire system.

When we reflect that a power of endurance can be imparted to the brain, and that weak minds have been restored to strength by Fellows' Compound Syrup of Hypophosphites, we cannot but conclude that the subtle power is really ponderable matter. Persons who study hard should preserve their balance power by using the Syrup.

NEW RICH BLOOD! Parsons' Purgative Pills make New Rich Blood, and will completely change the blood in the entire system in three months. Any person who will take one each night for 15 days will be restored to sound health, if such a thing be set to. Sent by mail, one dollar stamps. I. S. JOHNSON & CO., Bangor, Me.

MAKE HENS LAY. An English Veterinary Surgeon and Chemist now travelling in this country, says that most of the Hens and Cattle Feeders sold here are worthless trash. He says that Sheridan's Condition Powders are absolutely pure and immensely valuable. Nothing on earth will make hens lay like Sheridan's Condition Powders. Dose one teaspoonful to one pint food.

DIPHTHERIA! Johns' Anodyne Linctum will positively prevent this terrible disease, and will positively cure the same in ten days. Information that will save many lives sent free by mail. Don't delay a moment. Write to L. S. JOHNSON & CO., Bangor, Maine.

BUCKET'S BELL FOUNDRY. Established in 1811. Superior Bells of Copper and Tin, cast with the best Bell Metal, for Churches, Schools, Fire Alarms, Fire Clubs, Churches, etc. Fully Warranted. Illustrated Catalogue sent Free. VANDERBILT & TIFE, 100 and 104 East Second St., Cincinnati.

No Duty on Church Bells. Nov. 17, 78 1/2

THE EMPLOYMENT OF CHILDREN.

It is estimated that over 100,000 children are steadily employed in New York factories, many of them being under 12 years of age, and some, notably those engaged in the manufacture of artificial flowers, having only reached the age of 5 years.

The manufacture of tobacco furnishes employment to some 10,000 children. The girls are especially skilled in this industry, and a miss of 16 can put up thirteen gross of chewing tobacco in tin-foil and twenty-two gross in paper in one day. The wages paid generally range from \$3 to \$4 a week, according to age and ability.

In the paper collar industry nearly 10,000 girls from 12 to 16 years of age are employed. A skillful girl can count and box 18,000 collars during a day of ten hours' length. Many hundreds work in gold-leaf factories where delicacy of touch and close attention are indispensable, rather than heavy labor.

Among other industries which employ child labor are the manufacturers of paper boxes envelopes and twine and the burnishing of gold, silver and chinaware.

EVERYBODY SUFFERS PAIN.—It is the result of sin and violation of nature's laws. The great creator of the universe in his infinite mercy has done much to allay the suffering of his people by giving them out of nature's store-house "a balm for every wound." Such is the Pain-Killer made by Perry Davis & Son; it stops pain almost instantly, is used both internally and externally, and is of all other pain remedies the oldest and best.

The relaxing power of Johnson's Anodyne Linctum is almost miraculous. A gentleman whose leg was bent at the knee and stiff for twenty years had it limbered by its use, and the leg is now as good as the other.

REPAIRING THE EYE. Some curious facts have come to light about the regeneration of the eye during experiments made M. Philippeux, facts of a very pleasing kind, if we only infer that what applies to inferior animals is applicable also to man. M. Philippeux has been, it seems, anxious to discover whether on completely emptying the eyes of young rabbits and guinea-pigs, the vitreous humor would be reorganized, and whether even the crystalline would be reproduced. With this view, he has been conducting his operations, always, of course, taking care not to touch the crystalline capsule, for experience has shown that in order that an organ shall regenerate, a portion of it must be left in its place. It seems that a month after the mutilation was effected, the experimentalist was able to state that the eyes, which had been emptied, were filled afresh and that the crystalline was reconstituted. He operated on twenty-four animals, and in each case the mutilated eye revived. This would seem to show that the optic organ has the same capabilities as the bones; the organic process repairs an evil and reconstructs, more or less completely, that portion which has been struck off from the whole.—Galignani's Messenger.

What smoking does for boys. A certain doctor, struck with the large number boys under fifteen years of age whom he had observed smoking, was led to inquire into the effect the habit had upon the general health. He took for this purpose thirty-eight boys, aged from nine to fifteen years, and carefully examined them, and in twenty-seven of them he discovered injurious traces of the habit. In twenty-two there were various disorders of the circulation and digestion, palpitation of the heart, and more or less marked taste for strong drink. In twelve there was frequent bleeding of the nose; ten had disturbed sleep, and twelve had slight ulceration of the mucous membrane of the mouth, which disappeared on ceasing from the use of tobacco for some days. Medical treatment was of little use until the smoking was discontinued, when health and strength were soon restored. This is no "old wife's talk." The facts are given under the authority of the British Medical Journal.

Science is not all in the hands of infidels and unbelievers, nor is it left to them to make application of it to the uses of life. A noticeable thing in connection with the telegraphic celebration in New York, recently, was the fact that the projectors and originators of the ocean cable were men of Christian faith and practice. Mr. Morse and Mr. Field were both members of the same Presbyterian Church, and recognizing the providence of God, they also felt themselves as his agents in what they did. In his address at the commemorative meeting Dr. William Adams said: "One incident deserves to be immortalized on canvas. When Captain Hudson, devout as he was gallant, after the cable had been drawn to its anchorage on the shore, surrounded by his crew, with uncovered head, fell upon his knees, and beneath the stars gave thanks to Almighty God for his gracious favor, and for the new power born into the world."

THE CELEBRATED ESTEY ORGANS! New and Beautiful Styles! Catalogues Free.

NO AGENTS! NO COMMISSION! THE system of employing Canvassers at a high commission has been strictly abandoned by us, it having proved very unsatisfactory both to ourselves and customers. In future we will sell our Pianos and Organs AT NET WHOLESALE PRICES direct to purchasers. In this way buyers of Pianos and Organs will save from twenty to forty per cent by dealing directly with us, and moreover, far better satisfaction can be guaranteed.

We claim to sell the best Instruments to be had and at the lowest prices consistent with first-class articles. The cash system enables us to sell at a very small advance on cost of manufacture, although to honest and reliable parties we do not object to allow a reasonable time for payments.

Parties ordering by mail can rely upon getting as good an Instrument as if personally selected by themselves. Any Organ or Piano not found exactly as represented can be returned to us at our expense. We refer with pleasure to over Fifteen Hundred Pianos and Organs sold by us the last ten years. Thankful for the very liberal patronage accorded us hitherto, we can only say that we will continue our endeavors to thoroughly satisfy our customers in all their dealings with us.

SCIENCE.

How the Sea is Salted. Many people imagine that ocean-water is naturally salt, and will be surprised to know that the salt comes from the rocks and is washed into the sea. The sea depends on the disintegration of rocks on land for its saltness. It does not originate in oceans and seas. Rains wash it and hold it in solution as particles are liberated by violence, decomposition, and the gradual action of many natural forces. All streamlets and rivers, therefore, are constantly transporting salt to the sea. If there is more than can be held in solution, then it accumulates in masses at very deep points, which, in the revolution to which matter is subject, may again be a stratum of salt somewhere remote from where the mass was formed. Thus the salt-mines of Portugal, and the vast horizontal bed of pure salt in Texas, as well as that mountain of rock-salt in Domingo, was collected at the bottom of ancient seas, which are now dry land remote from water. There are places in Africa where the process of disintegration of salt from water is regularly going on, but there is not water-power enough to force it onward to the sea. Hence the particles are spread abroad and mixed up with soil. The negroes of Lalibul, in Northern Africa, having discovered its distribution where there is no water to dissolve in the ground, leach it. In that way they separate the salt. By evaporating the water holding it in solution, an excellent article for domestic purposes is produced. Salt prevades the earth. It exists in the grasses and most vegetable products on which animals feed. In that way they derive enough in most countries to meet the demands of their natures. They require as much as civilized humanity. With them salt is necessary, as with ourselves, for keeping the organs of vision in good condition. Stop the supply and blindness would be universal.

Repairing the Eye. Some curious facts have come to light about the regeneration of the eye during experiments made M. Philippeux, facts of a very pleasing kind, if we only infer that what applies to inferior animals is applicable also to man. M. Philippeux has been, it seems, anxious to discover whether on completely emptying the eyes of young rabbits and guinea-pigs, the vitreous humor would be reorganized, and whether even the crystalline would be reproduced. With this view, he has been conducting his operations, always, of course, taking care not to touch the crystalline capsule, for experience has shown that in order that an organ shall regenerate, a portion of it must be left in its place. It seems that a month after the mutilation was effected, the experimentalist was able to state that the eyes, which had been emptied, were filled afresh and that the crystalline was reconstituted. He operated on twenty-four animals, and in each case the mutilated eye revived. This would seem to show that the optic organ has the same capabilities as the bones; the organic process repairs an evil and reconstructs, more or less completely, that portion which has been struck off from the whole.—Galignani's Messenger.

meeting everywhere, leave no doubt as to how the heart of the church is inclined. Our people want the class-meeting. They look to their pastors to rekindle these holy fires that shall bring light and heat, grace and glory to Zion.

But what shall be done for class-leaders? They are at hand. There is plenty of material in the church. She has thousands of gifted and excellent men, now dwarfed and deadened from inaction, whose spiritual lives would burst into new growth, and bloom into beauty, and grow into fruitfulness, if they were called to the class-leadership, and would through themselves heart and soul into the blessed work.

We conclude with two statements deliberately made: 1. The revival of the class-meeting in all its original power is the pressing want of Methodism.

2. Such a revival of the class-meeting is entirely feasible. It can be had at once. The heart of the church is ready for the movement. The Head of the church is ready to crown it with his blessing, for he changeth not. His presence made for the class-meeting a glory to our fathers, and he will make it even so to us.—Nashville Chri. Adv.

SWORN STATEMENT OF A BOSTON POLICE OFFICER.

H. R. STEVENS.—Dear Sir,—From exposure I took sick about nine years ago with Rheumatic Fever, from which I suffered about four months. I recovered from the fever I found myself suffering with pain in my side and constipation which brought on the piles. I consulted a physician and he told me over \$500 for attending me, and all the while I was gradually growing worse. Then one physician after another was employed until seven of the best physicians of Boston had treated my case in hand.

On consultation between several of the leading physicians, they concluded my complaint was asthma and general debility. I had great difficulty in breathing, and an inhaler was required to afford me breath. Through the treatment of one physician I took from 75 to 100 boxes of catarrhal pills, and faithfully tried all the medicines that each physician prescribed. From my long sickness, and the vast amount of medicine used to overcome the great pain, my kidneys became badly affected, and I suffered excruciating pain in the small of my back, with great difficulty in passing my urine.

One physician said I was diseased all through my system, and he regretted that he could give me no hope for health. My suffering from indigestion was so great that it was impossible to keep any solid food on my stomach, and the whole nature of my food was broth from oatmeal.

I also took a prescription from a celebrated English physician, who said my trouble was Bronchitis and Dyspepsia. I took 15 bottles of medicine especially prepared for Dyspepsia, and I have used a great deal of medicine from that time until you could count the bottles by the dozen, and indeed I have given nearly all the paper advertised medicine a fair trial. I have a dreadful cough, and did not average over two hours sleep a night for 8 years.

A friend of mine advised me to try Vegetine, but for a long time I refused, having got completely discouraged from taking so much medicine without any benefit; however, after repeated persuasion, I concluded to try it, and before I had used one bottle I could eat and hold on my stomach a breakfast, a thing I had not been able to do for many months.

I kept on improving, and kept on using the Vegetine, until I was perfectly cured and able to do duty all day, and at night I could sleep well at night, and I am now 40 pounds heavier than I ever was before in my life, and as I think, a living medical talent of New England, for with all of their combined that simple vegetable medicine called Vegetine to which I am indebted for health, life and happiness.

EUGENE E. SULLIVAN, 37 Athens St., Police Station 4, Suffolk St., Boston, Mass., Nov. 25, 1878. Then personally appeared the above named Eugene E. Sullivan, and made oath that the foregoing statement is true, before me. ROSE B. BOVAY, Justice of the Peace.

VEGETINE. Further Proof. Facts Will Tell.

GOSFORD, N. H., Aug. 1, 1878. H. R. STEVENS, Esq.—Dear Sir,—Allow me to say a word in favor of Vegetine. During the past year I have suffered from a complication of diseases. I lay in bed from the 31 of November until the middle of the following June, and on an average did not sit up two hours a week; I had eight of the best physicians in the state, but got no help, and my stomach gradually grew worse. I had heart disease, phthisis, prae-sis, and kidney complaint, and could never be any better. I was reduced in weight 60 pounds, which is much. I am naturally thin.

In June, finding I was falling under the treatment of the physicians, I commenced the use of Vegetine through the earnest persuasion of friends, and I am happy to state, with good reason, I have gained ten pounds in weight, and I am greatly encouraged, and shall continue using the Vegetine if I can get it. I am a poor man, but for the truth of the statement I refer to any man in Gosford or vicinity. Yours very thankfully, A. J. BURBECK.

VEGETINE. Prepared by H. R. STEVENS, Boston, Mass. VEGETINE IS SOLD BY ALL DRUGGISTS, and at Wholesale by Brown and Webb and Forsyth, Sutcliffe & Co.
