

THE STRONGEST GUARANTEE of quality is in the association of names. The name Leach Chemical Co., is inseparable from that of

VIRGIN OIL OF PINE

which is put up for dispensing through druggists only in 1/2 oz. vials, each vial securely sealed in a round wooden case. Worthless imitations have been offered to the public, but always under an assumed name through which the imitator hides his identity and endeavors to evade responsibility for the deception. Virgin Oil of Pine compound pure will break up a cold in 24 hours and cure any cough that is curable. The name on the wrapper is your guarantee.

SWIFTEST SHIP AFLOAT.

The Destroyer Tartar Recently Made 37.037 Knots an Hour.

England's naval experts state that England to-day possesses not only the biggest and most powerful warships, but that she has afloat the biggest and fastest fleet of destroyers in the world. They point out that when the King recently reviewed the home and reserve fleets, off Spithead, it was proved that of the 182 ships reviewed, 166 were able to leave immediately for the maneuvers in an extraordinarily high percentage of preparedness.

England under present Administration has slightly reduced her naval expenditures. The total naval estimates for the year 1907-08 aggregated £31,419,500 (\$158,000,000), as against £31,869,500 (\$170,000,000) for the preceding year. This economy, though large, is unimportant considering the present great predominance of the British navy over all others. England intends to maintain this predominance by building four Dreadnoughts annually, and it is the intention of England to continue their construction until she possesses in vessels dating from the Dreadnought era alone as great a relative superiority over all other nations as she possesses to-day.

The destroyer Tartar was built by John Thornycroft. She is a turbine, and her highest speed was attained in one of the six runs over the measured Admiralty course. The turbines are of the Parsons type.

The dimensions of the Tartar are as follows: The length on water-line, 270 feet; width on water-line, 26 feet; depth, 17 feet 2 inches; displacement, 850 tons. The shape which has been adopted for the vessel is that usually chosen by the Thornycrofts, which includes the graceful turtle deck, in place of the raised forecastle. The turtle deck throws the water neatly overboard instead of under the upper deck. Her armament consists of three 12-pr. quick firing guns and two torpedo tubes.

The evolution of England's championship in the matter of the swiftest destroyer lies in the story of a long struggle against the resistance of sea and winds extending over years.

Thirty knots an hour was the speed aimed at, and in 1893 the Daring almost reached that point, making a trifle over 29. In 1896 this was exceeded by the destroyer Desperate, which attained the coveted speed of 30 knots an hour.

Then the Japanese upset England's calculations with the destroyer Usurimo, which made 31 knots. England at once raised the limit, and with the Albatross she again gained the record, this last named destroyer reaching speed of a little over 32 knots.

But England was not yet contented, and proceeded to build the Tartar, which first reached a 33-knot limit, then increased this to 35, and finally astonished the naval world by reeling off the speedy run of 37.037 knots.

ODD OBSERVATIONS.

Some of us have fads, others are fads.

When duty calls we are apt to say "Not at home."

We must usually plant labor if we want to raise money.

It is hard to believe the truth the way some people tell it.

It is soothing to the nerves to be popular with yourself.

Besides gathering no moss, a rolling stone gravitates downhill.

The less you think about yourself, the more others are apt to think of you.

If the question "Who is wise?" were put to popular vote, we should each score one.

Some people are so interested in making money that they forget how to spend it.

NEW USE FOR X-RAYS.

They are Said to Cure Excessive Perspiration of the Hands.

A German physician has used the X-rays, with success in the treatment of perspiring hands, a condition which is a source of great annoyance to some persons.

According to the Medical Record the fact that the hands of Roentgen ray workers become very dry led him to investigate the effect of the rays in cases of this sort. While it has not been found feasible to make use of the Roentgen rays as a means of destroying superfluous hair owing to the fact that in order to secure permanent atrophy of the hair follicles too great alteration of the skin as a whole must be caused, it appears that the functional activity of the sweat glands may be abrogated without undue risk.

The rays must be applied in considerable intensity, however, and in order to do this safely it is necessary to have an exact means of quantitative control.

WEAK, PALE AND WORN OUT WOMEN

Can be Saved From a Life of Misery by Dr. Williams' Pink Pills.

Women are called the "weaker sex," and yet nature calls upon them to bear far more pain than men. With too many women it is one long martyrdom from the time they are budding into womanhood, until age begins to settle upon them. They are no sooner over one period of pain and distress than another looms up only a few days ahead of them. No wonder so many women become worn out and old looking before their time.

In these times of trial Dr. Williams' Pink Pills are worth their weight in gold to women. They actually make new, rich blood, and on the richness and regularity of the blood the health of every girl and every woman depends.

Mrs. Urbane C. Webber, Welland, Ont., is one of the many women who owe present health and strength to Dr. Williams' Pink Pills. Mrs. Webber says: "About three years ago, while living in Hamilton, my health began to decline. The first symptoms were headaches and general weakness. After a time the trouble increased so rapidly that I was unable to attend to my household duties. I lost flesh, looked bloodless and had frequent fainting fits. I was constantly doctoring, but without any benefit, and I began to feel that my condition was hopeless. One day a friend asked me why I did not try Dr. Williams' Pink Pills and mentioned several cases in which she knew of the great benefit that had followed their use. After some urging I decided to try the pills, and had only used them a few weeks when I began to feel benefited, and from that time on the improvement was steady, and by the time I had used about a dozen boxes of the pills I was again enjoying the blessing of good health. I cannot too strongly urge other discouraged sufferers to give Dr. Williams' Pink Pills a fair trial."

Dr. Williams' Pink Pills will cure all troubles due to poor, watery blood, such as anaemia, general weakness, indigestion, neuralgia, skin troubles, rheumatism, the after effects of la grippe, and such nervous troubles as St. Vitus dance and partial paralysis. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

RECORDS OF OPERATIONS.

Cinematograph Pictures Now Used in Surgery.

Another step in advancing medical and surgical science has been taken by the Middlesex Hospital, London. Through the efforts of Dr. H. C. Thompson the cinematograph has been added to the equipment of the institution, and hereafter records will be reproduced on films of symptoms, germs and operations which will be used to illustrate lectures.

Arrangements have been made with a cinematograph company for the erection of special accommodations for these lifelike records. The operating room has to be lighted in a special way for cinematographing purposes. A special chamber will be provided, whither patients will be conveyed by electric elevators, and a light has been discovered by which photographs can be taken in all kinds of weather. The new premises will be the first to be erected solely for cinematographic purposes.

The cinematograph has been used in France for medical purposes for the past eight years, having been introduced by Dr. Doyen. But showmen obtained some of the films and exhibited them, thus bringing the cinematograph into disrepute and causing medical men to give it up almost entirely. It is now hoped that the records of the British physicians and surgeons will not gain a similar publicity.

TORTURING SKIN DISEASE Afflicted this bright little girl

Mrs. F. Miner, of 311 Suffolk Street, Guelph, Ont., says: "A year since, while living in Oshawa, Ont., my little daughter Lorinda, six years of age contracted a skin disease on the upper part of her body. This first broke out like tiny water blisters, afterwards taking the form of dry scabs. These would disappear for a short time and then reappear worse than ever. The clothes coming in contact with the skin set up such a severe irritation that it was impossible to keep her from scratching. We tried various preparations yet obtained no good results until we began using Zam-Buk. With each application the irritation and soreness was greatly relieved, and the child rested easier. Thro' continued using, the eruptions and scabs fast disappeared and in a short space of time the skin was completely cleared from the disease. It is now some months since we used Zam-Buk, and as there are no signs of any more eruptions breaking out on her body, we believe Zam-Buk has worked a complete cure."

"Mark my words," declared Mrs. Ferme, laying down the law to her long-suffering husband, "by the end of the century woman will have the rights she is fighting for." "I sha'n't care if she has," replied Ferme. "Do you mean it?" cried his wife. "Have I at last brought you round to my way of thinking. Won't you really care?" "Not a bit, my dear," returned her husband, resignedly. "I'll be dead then."

Do not give up in despair, you who suffer from obstinate disfigurements of the skin. Amend the sore spots with Weaver's Cerate and purify the blood with Weaver's Syrup. All druggists keep them.

COSTLY BRAGGING.

He was a very tired-looking man. Dejection was written on every line of his face, and as I was a stranger in the village, with nothing to do and no one to talk to, I relieved my pent-up spirits by expressing my sympathy with him in his troubles, whatever they were.

"Thanks," he said; "my chief trouble seems to be that I am an idiot from Ichiolville, and that is incurable. I just got into a bragging match with a stranger up in the post-office. He bet he was richer than I was, and I took him on—just for fun. I told him all I had and more, too, and after a while he gave in, saying he wouldn't have thought it. Then I said I'd swear to it, and he said all right, and I did; and by thunder, who do you suppose he was?"

"I don't know. Who?"
"The income-tax assessor!" he groaned.
It certainly was a case of hard luck.

"I don't know just how to say it, George, but you know my father is wealthy and I'm his only child."

"Say, Major, go ahead and say it. Don't hesitate. I'm not going to bite you. What sort of a proposal did your rich father authorize you to make to me?"

Pat had got hurt—not much more than a scratch, it is true, but his employer had visions of being compelled to keep him for life, and had adopted the wise course of sending him at once to the hospital. After the house-surgeon had examined him carefully, he said to the nurse—"As subcutaneous abrasion is not observable, I do not think there is any reason to apprehend tegumental cicatrization of the wound." Then turning to the patient, he asked, quizzically—"What do you think, Pat?" "Sure," said Pat, "you're a wonderful thought-reader, doctor. You took the very words out of my mouth. That's just what I was going to say!"

Sure Regulators.—Mandrake and Dandelion are known to exert a powerful influence on the liver and kidneys, restoring them to healthful action, including a regular flow of the secretions and imparting to the organs complete power to perform their functions. These valuable ingredients enter into the composition of Parmelee's Vegetable Pills, and serve to render them the agreeable and salutary medicine they are. There are few pills so effective as they in their action.
