HOW'S THIS?
We offer One Hundred Dollars' Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.
F. J. Cheney & Co., Toledo, O.
We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.
Walding, Kinnam & Martyn, Wholesale Druggists, Toledo, O.
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists.
Take Hall's Family Pills for constipation.

Our Business.
Bigness is said to be a quality which appeals especially to Americans. However that may be, a purely scientific interest justifies the spreading of information contained in a recent bulletin of the United States Geological Survey about the size of the United States. The area of the United States proper, exclusive of Alaska, island dependencies and the Panama strip, is given as 3,026,789 square miles. The absence of a discrepancy between the computation of the census bureau and the general land office. A conference was called between these departments and the geological survey, and the bulletin of the geological survey is the result—YOUTH'S COMPANION.

ARE YOU SUBJECT TO STIFFNESS?
Perhaps it is in the neck or shoulders. First thing is a good rub with Nerville. No more speedy remedy can be adopted. When applied to the muscles Nerville gives them flexibility and vigor; inflammation, soreness and stiffness disappear. "Whether in the chest or throat nothing can surpass Nerville," writes O. B. Denton, Lumber Merchant at Oak Bay, N. B. "Rubbed on at night, the trouble is gone by morning. I have never known Nerville fail, and Nerville always makes good. 25c. bottles sold everywhere."

Real Estate in Korea.
One of the most astonishing regulations has been made regarding the transfer of real estate in Korea. No one is to be allowed to sell or buy real estate except by permission of the governor. This is apparently a move on the part of the Japanese to prevent the selling of any land in Korea except to people that they approve, for the governors are, of course, under the Japanese advisers. It makes no difference that foreigners have as good a right to buy land as the Japanese. The matter will have to be tested in the courts before the powers will allow their citizens to be curtailed in their privileges in the peninsula.—Korea News.

HEALTH FOR RUN-DOWN WOMEN.
From the experience of Mrs. John Panke, Saskatoon, nothing compares with Ferrozone. "At times I was confined to my bed and couldn't do any work. I was run down in body, lost strength, my appetite failed, my color was pallid. Weary and cast down, it seemed I couldn't catch up. Ferrozone started a new kind of life in my blood, built me up, vitalized and strengthened my nerves, and finally cured my heart and stomach pain." Ferrozone is a re-builder that has special virtue in female ailments. Sold everywhere in 50c. boxes. Try Ferrozone!

The force of love is responsible for almost as many follies as it is for acts of nobility.
Familiarity breeds contempt, yet a man may have a contempt for riches without the aid of familiarity.
Piles get quick relief from Dr. Shoop's Magic Ointment. Remember it's made alone for Piles—and it works with certainty and satisfaction. Itching, painful, protruding, or blind piles disappear like magic by its use. Try it and see! Sold by C. H. Gunn & Co.
An educated man is one who can hold his own.

NEWEST LIGHT RAYS.
They Are Named I Rays and Are Said to Emanate From the Brain
—Named For Italy.

After X rays, N rays, after N rays, I rays. I rays proceed from the brain. They are thought rays. They were discovered by M. di Brazza, student at Liege, when repeating the N ray experiments of Prof. Charpentier. Charpentier found that the phosphorescence of certain substances is increased when they are brought close to a nerve or to a contracting muscle. When some one talks, variations are produced in the luminosity of calcium phosphates.
In another experiment Charpentier saw the phosphorescent substance shine all down the line of its application to the spinal cord. Charpentier concluded that the emission of rays goes pari passu with the activity of a new method of studying nerves and muscles. Dr. Brazza now claims to demonstrate what Charpentier surmised—namely, that "the brain is the seat of active radiation."
The I rays differ from the N rays in that they can pass through most substances and are not bent or refracted. Dr. Brazza observes them directly and indirectly.
In direct observation he applies a phosphorescent screen treated with platino-cyanide of bar or other phosphorescent substances to the patient's head. The screen is faintly illuminated by a radiographic tube inclosed in a wooden box.
When the subject concentrates his will, curious oscillations appear in the luminosity of the screen in relation with his psychical activity. When his attention is not concentrated, the light does not flicker.
The rays are not emitted equally from all parts of the head. They are nil at the forehead, increase at the temple and eyes and are at their maximum behind the ears. The I rays are named for Italy.—Thought.

TO THE POLAR SEA.
Dominion of Canada Now Stretches Very Far to the North.
The second Canadian expedition on the steamer Arctic reached Erebus Bay, where Franklin died, by way of Lancaster Sound, and Peel Sound, and returning, decided to winter at Pond's Inlet. Next spring Bernier will go up the Greenland coast as far north as possible.

Live Animals by Post.
In England the postoffice does much more for its patrons than does the Canadian postoffice. It handles telegraph and telephone messages, and in its parcel post system carries small parcels which in Canada are sent by express. The postal officials have thus to deal with many curious cases, but says The Daily Mail, it would be difficult to find a parallel to the following: "A white mouse was sent by post from Lancashire, but the sender, having studied the art of abbreviation, wrote 'West Ham' on the label instead of West Hamstead. The mouse bit its way through the box, and the astonished postman found it running about at the bottom of his bag. No one answering to the name on the label could be found in West Ham, and the mouse was fed and housed by the general postoffice for a month. A polite note was sent from Mount Pleasant, Clerkenwell, to the effect that a mouse was waiting there, and if not claimed within six days would be sold to defray expenses. It was also intimated that it was against the regulations to send living animals by post."

Chaper Liquid Air.
Up to the present time liquid air has remained chiefly an interesting chemical toy in spite of the somewhat exaggerated predictions that were made at the time of its discovery regarding its future use as a motive power and in the arts. Reports that an improved process of production invented in England has reduced the price to one-sixth, or about 2 cents a gallon, have stimulated fresh discussion about its possibilities. If the only cause of delay in its exploitation, this will naturally now go on with rapidity, while if the claims made for it are false its cheapened production will be no advantage to the world.
Coloring From Beets.
It is said that a good way to obtain red coloring in permanent form is to heat beets in an oven until quite soft, macerate with about an equal quantity of vinegar, express, evaporate the resulting liquid to one-half its original volume and then make up to the original value with alcohol. For extemporaneous use the liquor from pickled beets as ordinarily prepared for the table—that is, boiled in vinegar—would presumably give a deeper shade. Canned beets are in market and will answer as well in the latter case as the fresh article.
Tobacco Without Nicotine.
A German cigar manufacturer has invented a process by which the tobacco is given a treatment which extracts a large part of the nicotine. The extraction is not entire, for about 1 per cent. still remains. The flavor of the cigar is said to be unimpaired. The cigars are labeled "free of nicotine."

Heart Strength DOCTOR TO TWO POPES
FAMOUS PHYSICIAN WHO WAS THE FRIEND OF TWO PONTIFFS.

Dr. Giuseppe Lapponi Popular in Rome in Both Clerical and Anti-Clerical Society and a Familiar Figure At the Vatican—Reputation Vindicated As to His Diagnosis of Pope Leo XIII. Last Illness.
Dr. Giuseppe Lapponi, physician to the Pope, who died recently in Rome, had been seriously ill for some time of cancer of the stomach, and pneumonia setting in, he could not, in his weakened condition, withstand the ravages.
When Dr. Lapponi was sinking the Pope sent him the Apostolic benediction, and when the news of the death of the doctor reached the Pontiff he was exceedingly grieved.
Dr. Lapponi was very popular in Rome, in both Black and White societies—that is to say, among the Clericals as well as with the anti-Clericals.
When his death became generally known his friends said that the time had arrived to vindicate his reputation regarding his diagnosis of the nature of the illness of Leo XIII., which step the doctor always refused to take while alive. When the late Pope became ill the bulletins issued only revealed the symptoms of his disease, but did not mention the diagnosis itself. Many physicians and medical publications attacked Dr. Lapponi, saying that he did not recognize the fact that the Pope was suffering from cancer. Shortly before the Pontiff's death telegrams containing statements to this effect made abroad were submitted to the doctor at the Vatican and he emphatically denied that the Pope had cancer.
Dr. Lapponi was supported in this statement by his assistant, Dr. Mazzoni, but they absolutely refused to give out any statement regarding the real cause of the illness of the Pope. Later, when the interest in the case

A Plague of Malaria.
The excessive prevalence of malaria in Greece is engaging the attention of English physicians. It is said to be checking the development of rural life and is a very serious thing for the nation. Out of a population of 2,500,000 there were 230,000 cases of malaria annually, and the deaths were about 1,700. Last year the number of cases increased to 260,000 and the deaths to 5,916. Professor Savas of the University of Athens and physician to King George is initiating a movement to deal with the plague.

A WORD TO WOMEN.
Any sick woman is invited to consult with Dr. R. V. Pierce, physician, who is engaged in the treatment of women's diseases, at his office, 111 N. Y. In an active practice of more than thirty years, assisted by a staff of nearly a score of associate physicians, Dr. Pierce has treated and cured over half a million women. All diseases peculiar to women are treated with success. This consultation is absolutely free. Every letter is treated as strictly private and is held confidential. Answers are mailed promptly giving the best of medical advice. All answers are sent in plain envelopes bearing on them no printing of any kind. Write without fear and without cost to Dr. R. V. Pierce, Buffalo, N. Y.

The Table Top Cold.
"You have, madam," said the physician, "what I call a table top cold."
"What is a table top cold?" the lady asked.
"It is a cold brought on by marble tops in the late fall and winter. You ladies always wear short sleeves, and you always lean your bare arms on the icy surface of marble tables. This contact sends a chill all through you—a chill that you disregard. But in the morning you awake with a heavy cold. Marble table tops in the winter should be covered with a cloth if they are going to be leaned on. Then the table top cold would disappear."—New Orleans Times-Democrat.

Minister Speaks to Mothers
Tells His Wife's Experience for the Sake of Other Sufferers.

The following letter has been sent to Dr. T. A. Slocum, Ltd., for publication.
Dr. T. A. Slocum, Limited—Dear Sirs: Within the last two years my wife (who is of a delicate constitution) has had two severe attacks of grippe, both of which have been speedily cured by the use of your medicine. We have such faith in the use of your remedies that as a family we use no other. For toning up a debilitated system, for restoring to healthy action the heart and lungs, and as a specific for all heart diseases, your Ferriol and Oxomulion are the best. Yours sincerely, Rev. J. J. Rice, St. Walker Avenue, Toronto.
PSYCHINE, Pronounced Si-keen, is a scientific preparation, having wonderful tonic properties acting directly upon the Stomach, Blood and weak organs of the body, quickly restoring them to strong and healthy action. It is especially adapted for people who are run down from any cause, especially Coughs, Colds, Catarrh, LaGrippe, Pneumonia, Consumption and all stomach or organic troubles. It has no substitute.
PSYCHINE (PRONOUNCED SI-KEEN) is for sale at all dealers, at 50c and \$1.00 per bottle, or write direct to Dr. T. A. Slocum, Limited, 179 King St. W., Toronto.
There is no other remedy "Just as Good" as **PSYCHINE**.
Dr. Root's Kidney Pills are a sure and permanent cure for Rheumatism, Bright's Disease, Pain in the Back and all forms of Kidney Trouble. 25c per box, at all dealers.
Lots of wives never understand why their husbands should really need any spending money.

**Dr. Lapponi studied medicine in the Bologna School under Professors Murri, Concato and other physicians of repute. He distinguished himself in his studies, and in 1875 he took his degree of doctor of medicine. After practicing for while in Capoline, in Tuscany, he moved to Palermo, where he built up a large practice. In 1885 he moved to Osmo, whence he was called to Rome by Pope Leo to be Papal physician and medical attendant of the cardinals when in convalescence.
The Pontiff came speedily to place complete confidence in his physician, whose duties grew more and more arduous as the years passed. The Pope passed his ninetieth year and exceptional precautions had to be taken against the smallest possible danger. Dr. Lapponi attended him throughout his dying moments.
Dr. Lapponi's treatment of Leo XIII. was strongly criticised by Dr. Antonio Cardarelli after that Pontiff's death, and as the latter was a Senator as well as an eminent physician his published statements attracted considerable attention. Dr. Cardarelli claimed that the Pope died of tuberculous cancer, and fortified his statement with a long series of arguments based on his own experience and that of well known authorities. To this Dr. Lapponi and Dr. Mazzoni, who attended the Pope during his illness, replied in a long article, published on September 10, 1903, to the effect that, both these physicians after examining the patient understood his true illness as that of cancer of the stomach, and that Dr. Cardarelli's statements in the medical bulletins, and that in order to protect their professional reputations they then had recourse to a written statement made before a notary. This statement gave the exact**

DOCTOR TO TWO POPES
FAMOUS PHYSICIAN WHO WAS THE FRIEND OF TWO PONTIFFS.

Dr. Giuseppe Lapponi Popular in Rome in Both Clerical and Anti-Clerical Society and a Familiar Figure At the Vatican—Reputation Vindicated As to His Diagnosis of Pope Leo XIII. Last Illness.
Dr. Giuseppe Lapponi, physician to the Pope, who died recently in Rome, had been seriously ill for some time of cancer of the stomach, and pneumonia setting in, he could not, in his weakened condition, withstand the ravages.
When Dr. Lapponi was sinking the Pope sent him the Apostolic benediction, and when the news of the death of the doctor reached the Pontiff he was exceedingly grieved.
Dr. Lapponi was very popular in Rome, in both Black and White societies—that is to say, among the Clericals as well as with the anti-Clericals.
When his death became generally known his friends said that the time had arrived to vindicate his reputation regarding his diagnosis of the nature of the illness of Leo XIII., which step the doctor always refused to take while alive. When the late Pope became ill the bulletins issued only revealed the symptoms of his disease, but did not mention the diagnosis itself. Many physicians and medical publications attacked Dr. Lapponi, saying that he did not recognize the fact that the Pope was suffering from cancer. Shortly before the Pontiff's death telegrams containing statements to this effect made abroad were submitted to the doctor at the Vatican and he emphatically denied that the Pope had cancer.
Dr. Lapponi was supported in this statement by his assistant, Dr. Mazzoni, but they absolutely refused to give out any statement regarding the real cause of the illness of the Pope. Later, when the interest in the case

LEICESTER'S OLD TOWN HALL.
British history in the Middle Ages, and it is full of memories of the past. One of the most interesting of these is its old town hall. This was a monastery belonging to a great family, the Leicesters, and the site of the hall is its splendid open roof, with its massive oak beams and buttresses springing from the side walls. In this old hall Cardinal Wolsey, when at the zenith of his power, had been magnificently entertained. When he saw it again it was as a prisoner in the hands of Sir William Kingston on his way to London, to be tried for high treason. The cardinal met certain nobilities here, who questioned him prior to his removal—when he was suddenly taken ill—Leicester Abbey. In the latter retreat, of which now only some fragmentary ruins remain, Wolsey died on Nov. 29, 1530. Besides the Dominicans, the Austin Friars, the Franciscans, and the Friars Penitents had monasteries at Leicester. The town, too, anciently had a Mint, and coins have been found showing that the right of coinage existed here from the time of King Athelstan to Henry II. It was in Leicester, too, that Simon de Montfort, the founder of the English Parliament, ruled so long, and from the town Richard III. sallied forth to the fatal battle of Bosworth Field, fought on Aug. 21, 1485.

Some Little Habits Easily Cultivated.
A good memory for faces and facts connected with them, thus avoiding the giving of offence through not recognizing or bowing to people, or saying to them what had better been left unsaid.
An unaffected, sweet, distinct, and sympathetic voice. Learn to be appreciative of the natural mellow tones possible to every woman, and avoid the shrill ones that are so tiring to hear.
Cultivate the charm of making little sacrifices quite naturally, as if of no trouble to yourself.
Cultivate the habit of making allowances for the opinions and feelings of others as well as their preferences. We cannot all see matters from the same angle in this world. If we did, our world would be a very dreary, monotonous old globe.
Cultivate the art of listening without impatience to prosy talkers, and of smiling naturally at the twofold tale or incident. It really will not hurt you to hear it over again, and then remember that you are never so charming as when you are making other people think they are interesting.

Hair Has Teeth.
Placed under a powerful microscope, the hair shows a surface covered with strong, coarse, jagged teeth, rough rasp. It is in the teeth that can tell in a moment whether the locks offered them have been cut off or combed out. They do this by rubbing the hairs through the fingers. If the hair has been cut from the head, and has not been misplaced, it remains in its original position; but if it has been pulled or combed out, and put together regardless of the direction in which it grew, one portion of it will slip to the right and the other to the left. It does this because the jagged edges engage upon each other and pull in opposite directions. The philosophy of this is demonstrated by drawing a hair first one way and then the other, through the fingers, while slip easily toward the point, while considerable resistance is felt when the fingers are drawn from the point towards the end next the head.

Canadian Forestry.
In the opinion of the Dominion superintendent of forestry Canada undoubtedly holds the first place among the world, and notwithstanding the great drain now put upon its resources in this respect by the demands of foreign countries he thinks that its lead may be increased by judicious management of its great forests. The virgin white pine, he says, cannot last many years longer, but in the Douglas fir, the cedar, the western white pine, the spruce and the hemlock Canada possesses all but inexhaustible treasures. The spruce is the most widely distributed. Various species of it extend from the Atlantic to the Pacific coast and from the United States border northward to the limit of tree growth.
