Now let me here again summarise the evidence of these medical men. Here is a witness called for the Crown, who honestly tells us he is not an expert that he knows nothing about insanity, that the most he knows of insanity is that, signed the certificate to send a man to gaol whe is notoriously a lunatic, that he never spoke to Louis Riel on the subject of his decusions, that he never examined him as a lunatio. that he never spoke to him on the subject or made any attempt to discover whether or not he was subject to delusions ; he admitted that he was deaf and could not very well hear what was going on, and he admitted that if a man is subject to delusions and commits a crime within the scope of those delusions, he is not responsible for We are asked on that evidence to justify the Government for hanging this I say it is not enough to justify them. I say it is not enough to justify the hanging of a dog, let alone the hanging of a man. There is another aspect of this case which I wish to discuss for a moment. From the 15th March, when the first indication of an uprising took place, down to the trial of Louis Riel, and down to the execution of Louis Riel, there were doubts in the minds of many thoughtful men as to Louis Riel's sanity.

After the trial there were grave doubts

If he had ciced te hang him without waiting for the report of the medical commission, and the proof is under the hand of Sir John Macdenald himself. But does the John Macdenald necessity the action of the Government? No. On the contrary, I say this report in the clearest possible manner strengthens and confirms the avidence given at the trial by Dr. Clark and Dr. Roy. Dr. Valade, one of the commissioners, says :
