It is possible that the presidency will wome to Caigary. Though there has been no cauvass, arrangement of anything of that kind, yet a number of the payers have been suggesting that it is about time that the presidency. It is the only club in the league which has never had the presidency. It is the only club in the league which has not been so hopored.

However there is not likely to be a very flerce contest over the matter and the suggestion has not been so hopored.

kick and feeds his forwards with rare judgment. In Allan and McKenny the Hillhurst club have found two good forwards. Allan plays the game for all he is worth. He centers the ball across the goal that is bound to bring results. McKenny is an inside player, and the way he swings the ball to the outside man marks him a valuable man.

Geehan and Standridge will throw over everything to beat their team mates.

Carney received a letter from Catcher Ward from Regina asking if Bill could make a place. Ward is some catcher at that, but Bill cannot just figure out where he would come in with such men as Stanley, Flannagan and Pop. Gouchee on the list.

Shorty Parkes is still on the outlaw list, and no word has been received from him yet. One thing is sure Car-

The game ended 1 to 0 in favor of Carney and Captain Kallackley, Kal, will act as captain of the team. Being a good ball player, well up in all the wirlnkies, and in a good position at first, it is expected everything will go along smoothly in infield.

ting together a good, fast team, and they expect the series to show up, what their chances are in the league. If they can hold their own with the Hat, they feel sure they can do so with the other teams around the circuit. Geehan and Standridge are getting

in form at a good clip. Both these pitchers will make good. Carney says Ed. pitched a good game against Ta-coma. This was the first of the Tacoma series of which there was no report sent out. Calgary lost the game one to nil and Ed. pitched a swell game. He only allowed four hits while Calgary got six.

Calgary got six.

Stanley is getting a favorite amongst the fans as a catcher. Matt as the players call him, can reach the high ones airight. It is a pretty bad wild pitch that gets past him. Matt is also good hitter, but his worth is pegging to second. Stanley puts them right on the second bag, and woe to the one that tries to steal on him.

TAFT HANDSOMEST MAN

Sculptor Found President's Eyes Gentle, but Strong in Crisis

(From the New York World) "I believe the President is the handsomest man in public life." said Robert Atkin, the sculptor, on his return from Washington yesterday, where he has been to make a model for a bust

for the Actors' Fund fair. Mr. Atkin brought back the wax is the first bust of President Taft, and also the only one ever modeled entirely on the President's private desk at the White House. The bust was made Mr. Atkin invented a collapsible box which allowed him to let the wax model down on any part of the desk so that he might view the President from every angle as Mr. Taft attended

to his official duties. "Yes, I think he is the handsomest man in public life," Mr. Atkin declared. ne people will say he is too heavy; but after you have been with him a few minutes you forget his weight entirely. R. H. compared with his.
"Mr. Taft is a very difficult man to model. It is so easy to burlesque and caricature him, without producing the real man. His forehead and eyebrows. with the little sag above the eyes, are full of force and determination. has the prominent bulges that denote perception. The tremendous power latent in these characteristics is not

hard to express in marble. "The difficulty comes in showing the gentleness of his eyes. They are eyes of great depth and of unusual kindness and candor. Yet it was his eyes that convinced one he had even more force than Roosevelt, were he ever called upon to show it at a cirisis."

Mr. Atkin arrived in Washington a week ago last Thursday and spent the entire first day watching the President and studying his features. "The next day," said Mr. Atkin, "I

brought my wax in the collapsible box and began modeling. The President sat on one side of the long desk, with his back to the light from the windows, and his secretary, Mr. Car-R H E penter, opposite. "The necessity of adjusting the posi-tion of the wax to the position of the President's face, instead of adjusting the subject's face to the position of the model, was another handicap, but this was evercome by a simple me-chanism which allowed me to tilt and slant the model whenever the Pre-sident changed the position of his head. The result was that I practically had a continuous sitting for six days while the President went on with his office routine, dictating, receiving callers, and conferring, without losing much time to the usual posing."
