Catarth-A New Mode of Treatment. Perhaps the most extraordinary success that has been achieved in modern medicine has been attained by the Dison treatment for catarth. Out of two thousand patients treated during the past six months fully ninety per cent have been cured of this stubborn malady. This is not a new discovery, but a method of treatment that has been known for centuries, while the patient, and other advertised cures never record a cure at all. Striving with the same generally believed by the most scientific men that the disease is due to the presence of living parasites. Dison at once eradicates his cure to their extermination—this accomplished, he claims the catarth is removed, and the permanency is unquestioned, as cures effected by him two years ago are cured still. No other treatment has ever cured catarth. The application of the remedy is simple and can be done at home, and a special season of the year is the most favorable for the cure of an catarth. Sufferers should correspond with Mr. A. H. Dison, 38 and 39 Union street, Toronto, Canada, and enclose stamp for his treatise on catarth.
