

## WHY U-BAR GREEN HOUSES EXCEL

There is the downright practical side of U-Bar houses, the side that means more flowers, more vegetables of finer quality, with less care and expense than in any other house constructed any other way. The reason for this is,—more light. You see, there is no gutter at the eaves—no heavy framing members—the glass is spaced 24 inches. Every structural detail has been reduced to the smallest possible point. Still, with all the extreme lightness of construction, there is not a more rigid, enduring house made—and it is the U-Bar that does it.

The catalogue, although filled with U-Bar houses, both exteriors and interiors, also shows plans, sections and all the interesting structural details that you like so well to know. Send for it.
