

the civil airworthiness authority of a Party to enable it to find that the design, manufacture, and condition of these products comply with the laws, regulations, standards, and requirements of this Party concerning airworthiness.

- c) "Civil Aeronautical Product" herein also referred to as "product" means any civil aircraft, or aircraft engine, propeller, appliance, material, part or component to be installed thereon, new or used.
- d) "Civil Airworthiness Authority" herein also referred to as "Airworthiness Authority" means the national organization of the Party which is charged by the laws of that Party with regulating the airworthiness and environmental certification, approval, or acceptance of civil aeronautical products.
- e) "Design-related operational requirements" means the operational or environmental requirements affecting either the design features of the product or data on the design relating to the operations or maintenance of the product that make it eligible for a particular kind of operation in one of the States.
- f) "Environmental Criteria" means criteria governing the design, performance, materials, workmanship, manufacture, maintenance and modification of civil aeronautical products as prescribed by the civil airworthiness authority of a Party, to enable it to find that these products comply with the laws, regulations, standards, and requirements of this Party concerning noise abatement and emissions.
- g) "Exporting State" means the State exporting a type design, or a modification thereof or a product under the provisions of this agreement. The airworthiness authority of the exporting State will be referred to as the exporting authority.
- h) "Importing State" means the State importing a type design, or a modification thereof, or a product under the provisions of this agreement. The airworthiness authority of the importing State will be referred to as the importing authority.
