

*Fifth Paper.*

In the present article, the Reports and Reprints are those of the Provincial Museum, Toronto, issued by the Department of Education. The museum numbers are those of the same museum; the weights, avoirdupois, and the measurements in inches, except where otherwise stated. The writer has been fortunate to bring to notice and thus place on record a new type of human effigy pipe, Ontario, which came to his notice this summer.

No. 1.—Human figure pipe, found by W. Foster, on village site No. 23, S. 1½ Lot. 12, Con. 1, Fenelon Twp., Victoria Co., several years ago. This pipe repre-

No. 1

sents a person standing in an upright position, the body being so enlarged as to give one the impression that a burden was being carried. Material, dark grey soapstone well-polished; shows nothing but purely aboriginal workmanship of the quality that is noticed in other stone pipes from this locality. The legs are extended, being slightly bent at the knees which show creases behind. The arms
