Appellate Court—First Division.

Judgments: Rex vs. Gurofsky.

Louis Gurofsky was tried before a judge and convicted of obtaining by false pretences the sum of \$69.40 from three foreigners. The sum he was charged with securing was paid by the foreigners as fees to Gurofsky, who guaranteed that they should be admitted across the United States border on their way to Malta, and France. It is held that the undertaking was merely promissory, and that there was no false pretence. Conviction quashed.

Rex vs. Hoffman—Percy J. Sanderson, barber, charged with manslaughter in not providing medical attention for his wife, who died. The court points out that the wife had left her husband's house and her mother had called a doctor before the husband actually knew that she was ill. Conviction quashed.

Rex vs. Hoffman—J. H. Hoffman, bartender, was tried before a magistrate of Toronto and convicted of the offence of forgery; case reserved by the police magistrate under the provisions of sections 1014 of the Criminal Code. Hoffman signed the names of Holmes & Morgan in endorsing a cheque, which was made payable to himself and to the firm of Holmes & Morgan. It is held that the signature was made without authority and with the intention that the Standard Bank should act upon it. The amount of the cheque was \$300, of which \$51 to himself as costs.

Whimsey vs. Whimsey—This is an action for alimony at the rate of \$15 per month. The plaintiff appeals upon the grounds that the allowance is inadequate, and that the alimony should be directed to run from the date of the writ. The defendant's appeal is upon the ground that upon the facts disclosed the plaintiff is not entitled to succeed at all. F. W. Whimsey advertised for a wife and Mrs. Whimsey replied. They were married, he being 66 years of age and she was 25. The defendant's appeal is allowed and the action is dismissed.

J. W. BENGOUGH TALKS TO SINGLE TAXERS

As a result of other engagements, Rev. Dr. Salem Bland was unable to be present at the regular meeting of the Single Tax Association, which held its regular meeting in the auditorium of the Central Y. M. C. A. last night.

The breach, however, was very well filled by J. W. Bengough, who gave a talk on "Single Tax," and the illustrations with which he adorned his subject were very apt and clever.

He took issue with some of the statements made by William Lyon Mackenzie King, at the Empire Club last week, in which the latter declared that all profits in every industry should be divided between labor, capital, management and community.

Mr. Bengough showed in his lecture the need of land tax reform, whereby the landowner instead of owning all the benefits which accrued as a result of the community surrounding the land, as has been the case heretofore.

French Officer is Sent To Aid Polish Commander

Paris, March 14.—Major-General Henrys, of the French army, has been sent to Poland by the supreme war council, as military aide to Gen. Pilsudski, the commander-in-chief of the Polish army. Gen. Henrys served in Morocco before the war, and distinguished himself at the French front, and afterward in Macedonia. He was in immediate command of the French troops in the victorious Macedonian offensive of last September.

The decision to send Gen. Henrys to Poland was reached by the council after it had heard a statement by M. Carton de Wiart, who recently returned from Warsaw.

POISON GAS MADE OF PEACH STONES

Professor Woods Tells Kiwanis Club Some Secrets of War.

Brantford, March 14.—The Kiwanis Club at their luncheon today at the Brantford Club, has as their guest, and the speaker for the day, Professor Woods of Chicago, the first aerial postmaster appointed by the United States, and an inventor of note.

Prof. Woods referred to the German propaganda in the United States. He spent a year and a half in the secret service for the federal government across the border.

The scientists had collaborated in

combating the German wireless users, submarines and gas, and from peach stones had manufactured, not charcoal for gas masks, as popularly believed, but a poison gas of tremendous power, which would blast all life, whether human, animal or vegetable. The great problem now was to safely dispose of it.
