"PLESIOSAURIAN GLIDE" NOW.

Dancing Teachers Hall New Step as Knell of the "Shimmy."

Philadelphia, April 19.—Philadelphia dancing teachers hall with delight from Buenos Aires that a new tango-chorean glide, has been invented, and that three new tangos have been dedicated to the patagonian monster for which Argentine naturalists are on a still hunt.

They united in saying that if the dance proves popular it will sound the death-knell of the "shimmy" and its little sister, the "toddle."

The fact that the plesiosaurs glide

is done to tango filled one teacher with hope. Once popularize the tango, she said, and something artistic will have been accomplished. Jazz dancing is dying, the teacher continued, and the tango will mark the passing of music that suggests feeding time at the zoo or lightning striking a hardware store.

Another teacher said he welcomed the innovation, but that the name probably would have to be changed to fit the vocabulary of the dancing public. When told of the plesiosaurs' alleged love for prehistoric mud, the teacher suggested "mud turtle glide."

BETTER THAN HARD COAL

Soft coal so free from soot that it does

not make whisks on stove covers or pipe

and does not mat or cake when burning, is

far better than Hard Coal for general

household use. Quicker to light, takes

less to make a fire, cheaper in price and

can also be used for open fires and

small heating stoves. Such a coal is

Broad Cove soft coal. The main thing is

to insist on getting the genuine article.

No other soft coal burns just like Broad

Cove. You will know it by the above

characteristics.
