BRIDGING THE ST.

JOHN AT VAN BUREN

The Hango Commercial says that in the Maine legislature on Tuesday Mr. Hersey of Houlton, presented an act incorporating the St. John river toll bridge company, granting a charter to William H. Conliffe, Frank W. Mallett, A. G. Emmons, David C. Durpee, J. Raymond Burpee, William D. Burpee to build a bridge across the St. John river between Van Buren and St. Leonard in New Brunswick, establishing the right of the usual toll, the bridge to be erected within four years and the capital stock to be \$40,000.

Mr. Hersey is vitally interested in the bridge proposition, because it was largely due to his energetic efforts that the last legislature made the appropriation for the construction of this bridge. This appropriation amounted to \$27,500 for the state of Maine. The Canadian government made an appropriation of a similar sum and the work is now well under way.

Originally it was expected that the bridge would be designed for both a highway and railway bridge, but when the matter was taken up it was decided by Attorney General Phillbrook and Highway Commissioner Sargent that the terms of the resolve making the appropriation did not permit of this being done. It is believed by many that such an arrangement would have been beneficial to the state as a whole. It would have made it possible for the Bangor & Arctostic to have tapped at Van Buren, the great ocean to ocean line of Canada, the Grand Trunk Pacific, now building as well as the Canadian Pacific and the road which is now contemplated, which is to extend from St. Leonard to Gaspe on what is known as the North Shore.
