

CUNNABELL'S NOVA (95) SCOTIA ALMANAC.

## Star Life Assurance Society of London.

Chief Office, 44 Moorgate Street.

CAPITAL, £100,000 STERLING.

THE above Society continues to Insure on all eligible Lives, in the British Provinces, by their Agent, at Halifax, on the most favorable terms—their rates and privileges on examination will be found as favorable as any other London Company; 90 per cent of their net profits being divided among the Policy holders every five years; and the Board of Directors have instructed their Agent to allow the assured to proceed to and return from England by Steamers or first class sailing Vessels, on the payment of five per cent for both passages.

As a proof of the high standing of this company in Great Britain, the number of their Policies are fast increasing. The benefit of Life Assurance Societies has again been manifested in the recent decease of an individual in the Island of Newfoundland, after payment of only one annual premium, to a respectable London Company from whom his representatives now receive the sum of One Thousand Pounds, sterling; this surely will recommend Life Assurance to all classes of persons among us, particularly to young married men, and those intending to marry.
