This action on the part of Oak Bay, not unby the ratepayers of Victoria on the bylaw for the expropriation of the holdings of the Esquimalt water works company, will re-open for discussion the whole question involved in the water problem confronting the people of this city.

Careful students of the situation fear that the legislature will not now hesitate to grant the powers asked for public, on such terms as may be arranged between the said Council and

fear that the legislature will not now hesitate to grant the powers asked for by Oak Bay on this occasion, and should this expectation be fulfilled the loss of the neighboring territory as a market for the supply of water by the city would be a grievous blow to the community. The Esquimalt company is likely in the near future to be in undisputed possession of the monopoly of supplying water to all the neighboring districts outside the boundaries of the city of Victoria; and thus, even if the Sooke Lake scheme be proceeded with and water brought in, the city would be compelled to confine the sale of it to the people of Victoria only.

In view of the importance of the question which has now been raised by the renewal of the application of Oak Bay, the positions of the city, and the private bills committee of the legislature on the occasion of the discussion, on the application last year are here given.

Mayor Morley, in a letter forwarded to the chairman of the private bills committee, set out the grounds of the city's opposition to the appli-cation of the Oak Bay municipality as

follows:

"(a) A certain territory which does not include Saanich or Oak Bay was given to the Esquimalt Water Works company by its acts of incorporation of 1883 and 1892 and to these terricitories the private company is confined, masmuch as it was a territory of which the city of Victoria was deprived by the passing of the Esquimalt bill in 1885;

(From Wednesday's Dally.)

It is now assured that at an early date Victoria will possess one of the most up-to-date fire departments on the continent, when the size of the city is considered. This is made possible by the generosity of the rate-payers in sanctioning the loan of \$50,000, the bylaw for which was voted on a couple of weeks ago.

Already Victoria is famed among the coast cities for the efficiency of the coast cities for the coast cities for the efficiency of the coast cities for the coast cannot to the coast cities for the coast cities for the coast cities for the coast cities for and 1892 a territory assigned to it;
