MINERAL RESOURCES OF

THE QUEEN CHARLOTTES

in Various Parts of

Islands.

## Some Reasons Why

Island, a modern plant for the manufacture of wood pulp, newspaper, pa per box board, and a general line of wrapping paper. It has no patents no new schemes for the manufacture of pulp or paper, or no mysterious or intricate processes for the manufacture of these products. The com pany have acquired 86 square miles of pulp limits in and around Quat sino Sound, including a 20,000-inch water record at the above point and the ambition of the directors is to make this plant one of the most modern and up-to-date paper mills of Canada. When fully complete the mill will have a capacity of 600 tons of news and wrapping paper per week, and we are confident that we will have the wood pulp division, with a weekly capacity of 100 tons of pulp, in operation by December 1st of this year. Mr. Chas. B. Pride, of Appleton, Wis., who has been engaged as architect and engineer, has made arrangements to rush every depart ment of the work and is confident of having the first division of the big plant in operation before the end of the year. Mr. Pride is one of the st eminent authorities in the United States and Canada on the erection of pulp and paper mills, having built more than 50 of the leading paper mills of the country, among them being the great Rhinelander Pulp and Paper Co., Oconto Falls Paper Co., Wisconsin Tissue Co., Howard Pulp and Paper Co., and scores of others. The purpose of the company is to fine the Quatsino plant exclusively to the manufacture of news, wrapping paper and box board. Our splendid water power and the low cost of pulp wood will enable us to turn out news and wrapping paper at s than \$30.00 per ton, and our proximity to the great Oriental markets will give us a splendid advantage over American or European manufac-

The Western Canada Wood Pulp and Paper Co., Ltd., of Victoria, has been organized for the purpose of erecting on Quatsino Sound, Vancouver and China markets at from \$50.00 to \$55.00 per ton, and we are able to and China markets at from \$50.00 to \$55.00 per ton, and we are able to secure a freight rate from Victoria to these points at from \$3.00 to \$5.00 per ton. The Oriental markets annually consume millions of dollars of news and wrapping and on account of our geographical position and facilities for manufacture every dollar of this vast trade rightly and proper-ly belongs to British Columbia. For the last two years there has been a universal shortage of wood pulp and paper. The demand greatly exceeds the supply and in consequence the entire product of the majority of the big mills are booked for the present year. No industry, not even mining itself, has such splendid prospects from the viewpoint of investment as the manufacture of wood pulp and paper in British Columbia. At present it is impossible to secure stock in the majority of the operating paper mills of Canada, and there is no reason why the plant which we are now erecting should not pay conservatively 10 per cent. better dividends than eastern mills. We have cheaper pulp wood and an eminent advantage in regard to markets. If the pulp and paper mills of Ontario and Quebe can pay good dividends, we can do even better in British Columbia. What we want is not only one, but ten mills in western Canada in order to supply the constantly increasing home trade and that of the Orient Why should the people of this province annually import hundreds of carloads of paper 3,000 miles from the east when we can manufacture it more cheaply at home? Let us get together and build up our own indus tries and develop our own country. Every pulp and paper mill estab-lished in British Columbia means a new town of from 1,000 to 5,000 population and the employment of hundreds of people. Let us get together. What others have done, we also can do
