

Wire Reinforcing—Continued.

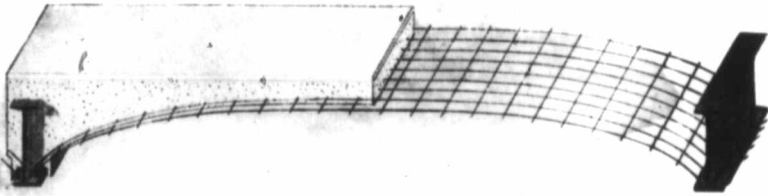

Figure 3 shows a light construction with spans as wide as 15 feet centre to centre.

Our Crimped Steel Wire Reinforcing of 2 inch \times 4 inch mesh, made of No. 3 Steel Wire, would be suitable for this construction.

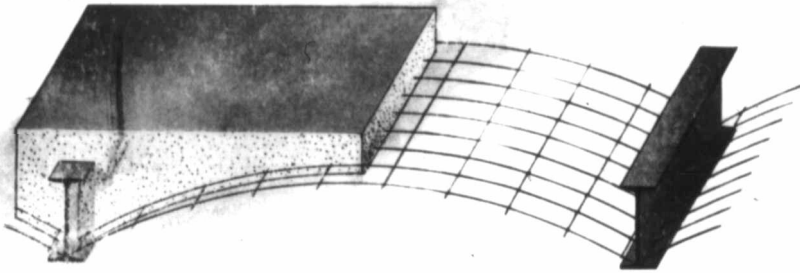

Figure 4 shows a heavy construction with spans of 6 feet centre to centre.

Our Crimped Steel Wire Reinforcing of 2½ inch \times 4 inch mesh made of No. 6 Steel Wire, would be suitable for this construction.

For Table of Breaking Strains, etc., see page 10.
