'FORE DADDY'D GO TO BED.

Each light for fifty years or more 'Fore daddy'd go to bed, He'd come 'round tryin' every door, From front hall to the shed, And then he'd blow the candle out And set it on the bin, And by and by you'd hear him shout:

"Is everybody in."

And if it happened one of us Young fellers still was out, He'd walk aroun' and fret and fuss And say he had no doubt That somethin' had befallen us Or we'd fell into sin, But when he'd hear our trampin' feet He'd say: "Thank God, you're in!"

And now I reckon he's up thar, Amaitin day by day, To bid us welcome from afar If we should go that way; But one thing's certain, he won't

Until his kith and kin And all are gathered in.

OLD PHOTOS.

have not numerous old photographs lay in St. Nicholas. too precious to be thrown away, yet of interest to few besides the immediate family. These generally take up too much space to be kept where they can be got at conveniently, and so are carefully put in boxes in the store room or attic, to be kept from the dust. So when we would gladly spend a few moments looking on the familiar faces and scenes, alas, it is too much trouble to get them out. Here is one solution of the problem: Put the photographs in clear, hot Kin run an auto like he can. water, and in a short time the pictures can be easily removed fram the cards. When dry either trim down the picture (to economize space) or cut away the background entirely. This last requires care, but can be done without destroying the outline. Mount these in a scrap book or, better still, a book made especially for kodak pictures. This book or these books, if more than one is needed, can be made very interesting by clever arrangement of the pictures, grouping relatives, school friends, army comrades, babes, out of door scenes, etc., in different portions of the book.

TWO VALENTINES.

Cupid will bring you this, So greet him with a kiss, O sweetheart mine! And if you bid him "stay," He will remain alway, An everlasting valentine!

A rose, to symbolize thy face, A lily, love, to show thy heart, Wherein I hope to hold a place Till cruel death shall make us part. In love's sweet name, dear heart of

mine. Receive, I pray, this Valentine.

USED MEN AT THE OFFICE The Psychological Conditions of Memory

(By Thos. S. Crowe, M.D.) Memory comprises the two-fold process of conversation and reproduction. The former is an essential as the latter, because without a storage of thoughts and events reproduction is impossible. As impressions reach the brain, if they are to be recollected, they must be organically registered. They must be fixed there in some way ready for future use; and the means by which the registration is accomplished constitutes the all-im-

portant question for consideration. The latter process, that of reproduction, is readily comprehended when once the mechanism of conservation has been satisfactorily explained. When an impression is received by

the brain, whether it be that of a word, an image or a fact, there is immediately a "modification of the constituent elements" in the nervous tissue. The molecules of which the nerve cells are composed undergo alteration in respect of their relative WORLD'S GREATEST BELL POUNDRY position and arrangement. The result of the disturbance is that an imprint remains on the nervous structure which may be roughly compared to that of a seal upon softened wax. No change takes place in the composition of the nerve cell, but there is a fresh distribution of its tiny particles. The effect of this modification has some analogy with the impression of a man's footsteps on a sandy beach. A new imprint is made at every step, yet each particle of sand maintains its normal structure and character.

Illustrating this kind of molecular modification it can be observed that by them in its turn. Similarly by by brushing the smooth surface of wa- association and by comparative comter with a feather the liquid does not bination, the molecular constituent of resume its normal condition. The sur- nerve cells interact and thus afford face may again resume its smoothness opportunity for unlimited storage of and it may appear as if it had never imprints. been disturbed; yet, as a matter of new conditions forced upon them.
