

Auto Tongue Truck on Deering and McCormick Binders SELF-STEERING FEATURE

The binder is purposely thrown out of square in this illustration in order to show clearly the steering action of the tongue truck wheels.

When the outer end of a binder platform starts to hang back, it pulls the tongue truck toward the grain.

Any movement of this tongue truck toward the grain turns the truck wheels in the opposite direction and so great an angle that they automatically steer the binder back to its proper square cutting position, with the horses moving steadily straight ahead.

The binder cuts a full 8-foot swath with less work for both driver and horses.

For A Sure Harvest

IF your Deering or McCormick binder is in good condition when it goes into the field the chances are all in favor of its finishing the job without trouble. Should you have an accident, both repairs and extra help are within calling distance. The farmer who uses a Deering or McCormick binder is safe as can be. He can depend upon it to harvest his crop with the least possible work and trouble.

There are some Deering and McCormick features it will pay you to know about even if you do not need a binder this season. You will want to see the new auto tongue truck that shortens the work by hours and eases the strain on horses and driver. The wide, deep-tugged steel main wheel with its 10-inch face; the strong, well-braced reel with its outside reel support; the equalizer that keeps the canvases running true; the three handy levers for tightening and loosening the canvases; are all important features because they help in the work of harvesting your grain.

Visit the local agent soon and see these machines. It will pay you. Would you like to read about them in the quiet of your home—then drop us a line at the nearest branch house.

Sydney Basic Slag

Our Ontario Salesman writes that he is being worked to death dealing with the inquiries we are sending him. The 6,000 tons of Sydney Basic Slag that have been used in Ontario since 1913 are telling their tale, and farmers are now looking for our goods. Even if you are using other fertilizers with good results, we want you to use a ton of Sydney Basic Slag this fall, and try it bag for bag against what you have hitherto employed. We are satisfied you won't get any worse results, and when you come to settle the bills you will find it easier to pay \$20 than \$30 or \$35. Don't you think so? Send us your name and address right away, and we will have our General Salesman call on you.

Interesting descriptive literature on application.

MR. FORD OWNER here is the book you've been looking for

The book that answers all your questions and saves you dollars on your car is

The Model T Ford Car Its Construction, Operation and Repair

By
VICTOR W. PAGE

This is the most complete construction book yet published on the Ford Car. A high grade cloth bound book, printed on the best paper, illustrated by specially made drawings and photographs. The construction is fully treated, and operating principles made clear to everyone. Every detail is treated and explained in a non-technical yet thorough manner. Nothing is left for you to guess at. The Ford owner, with this book at hand, has an infallible guide in making every repair that may be necessary. The book is written for Ford drivers and owners, by an expert who has driven and repaired Ford cars for a number of years. The illustrated chapter on overhauling and repairing alone is worth many times the price of the book. If you own a Ford you want this book. Write us for it to-night. PRICE \$1.00
