2 Yearling Holstein Bulls 2

and several younger females, all ages; cows in E.O.P. and R.O.M. Will sell half interest or all of our old herd. Sire and show bull, "King Fayne Segis Clothilde," five years old.

R. M. HOLTBY
Phone. R.R. No. 4, PORT PERRY, ONT.
Manchester and Myrtle Stations.

Woodbine Holsteins

Young bulls and dam calves, sired by Duke Beauty (Pietertje); sire's dam record 32.52 lbs. butter, and his two granddams are each 30-lb. cows, with 30-lb. daughter, with 30-lb. granddaughter. Three generations of 30-lb. cows. If you want a bull that will prove his value as a sire, write: A. KENNEDY & SON, R.R. No. 2, Paris, Ont. Stations: Ayr, C.P.R.; Paris, G.T.R.

Maple Grove Holsteins

Do you know that Tidy Abbeekirk is the only cow in the world that produced three sons who have each sired 30-lb. butter cows, and two daughters with records greater than her own. She was bred, reared and developed at Maple Grove. Do you want that blood to strengthen the transmitting power of your herd, at live and let live prices, then write: H. BOLLETT
TAVISTOCK, ONT. R.R. No. 1.

The Maple Holstein Herd

Headed by Prince Aaggie Mechthilde. Present offering: Bull calves born after Sept. 1st, 1913. All sired by Prince Aaggie Mechthilde and from Record of Merit dams. Prices reasonable.

D. A. MACFARLANE : KESLO, QUEBEC

JERSEY BULLS FOR SALE—I have three very choice registered Jersey bulls, from 6 to 10 months old, from imported sire, and from dams that are great producers. Prices very reasonable. Write: CHAS. E. ROGERS, INGERSOLL, ONTARIO

Please mention "The Farmer's Advocate."

ment station tests, is about equal. When fed with caution they give similar results on the ordinary farm, but for general practice on the Canadian farm, no succulent food can equal Swede turnips, on account of their safety and beneficial influence upon the stock. The variation experienced in the maturity and other qualities of corn silage, renders it less uniform in its results for sheep feeding. When rich in grain it is too heating, and when immature it is too acid to be easily digested or keenly relished. Where roots are not available, silage is a fine substitute, or the two foods may be fed alternately during the housing season."

An Exciting Trip to New Zealand and Australia.

The following extracts from a letter recently received by W. B. Rodhouse, Deputy Minister of Agriculture, from Dr. G. C. Creelman, President of the Ontario Agricultural College, who, with Mrs. Creelman, left the first of August for a trip to New Zealand, Australia, China, and Japan, may be of interest. The letter was written from Sydney, N.S.W., under date of September 24th.

We were four weeks crossing, with lights out, canvas covered, no wireless news, no nothing, but garbled reports at Honolulu, our only port of call. At the last-named town the British Admiralty held us up a week, but the Ship Commander kept us on board in the harbor for the last six days, not a passenger allowed to go on shore. We left our course entirely, and finally arrived at Auckland, New Zealand, on the last day of the month of August.

In New Zealand the people certainly laid themselves out to give us a good time. They held meetings everywhere in the two Islands, and divided up the several delegates to the different towns or districts. I was specially set apart for the District of Canterbury in the So. Id., with Christ Church as headquarters. The Board of Agriculture, the officers of the Department of Agriculture, the University authorities, all combined to keep me busy, and they incidentally kept me going through all of their agricultural activities. Sheep, frozen mutton, and wool, then cheese and butter, are their principal products. I early found out why they could so successfully compete with Canada in dairy exports:

(1) The season is just the reverse of ours. While we compete with the European countries like France, Denmark, etc., and all rush our biggest shipments into Britain from July to February, New Zealand starts where we leave off, and keeps it up through a large part of our season as well.

(2) The cows pasture on (green) grass all of the year. Every day when dry they are turned out into the green bushland, and cost practically nothing.

(3) No buildings, or at best but milking sheds, are required.

(4) Being near the sea at every point, the rail haul is reduced to a minimum, and the ocean charges are very low indeed.

(5) A most excellent Dairy Division gives very superior instruction and supervision and all are working in harmony to one end—the maintaining and improving of dairy products in New Zealand.

Holsteins are growing in popularity, though Shorthorns of excellent dairy strains are plentiful and well liked. Jerseys and Jersey grades are still the most numerous, and the climate suits them admirably.

Personally, we are in good health, and except for the perilous times (the mobilizing and drilling and marching troops), we are keeping to our schedule pretty well.

Yesterday we arrived in Australia (1,200 miles from New Zealand) and find the weather delightful. Straw hats just appearing, spring flowers in full bloom, orchards white and pink, haying in sight, and the robins nesting again.

To-morrow, through the kindness of the Department of Agriculture of New South Wales, we motor to the Agricultural College at Hawkesbury, thirty miles. Next week, Melbourne (Victoria) and vicinity, then Adelaide (South Australia) and back to Sydney to sail (D.V.) to Japan, leaving Sydney about October 10th.

FAIRVIEW FARMS

Can furnish you a splendid young bull ready for immediate service, and sired by such bulls as PONTIAC KORNDYKE, the greatest producing sire of the breed, and also the sire of the greatest producing young sires of the breed; one of his sons already has six daughters with records above 30 pounds, RAG APPLE KORNDYKE STH, now heading our herd, and a few by a good son of PONTIAC KORNDYKE, and out of officially tested cows. Come and look them and the greatest herd of Holsteins you ever saw over, or write just what you want.

E. H. DOLLAR, Heuvelton, New York (Near Prescott, Ont.)

Don't Tough It Out Another Winter

MAKE your home comfortable. Install a furnace—and while you are at it make it a Hecla—because—

- 1st You want to save that one ton in seven.
- 2nd You want a furnace that can't leak gas or dust—YOU DO for sure.
- 3rd You want a mild heat—lots of moisture.

Once you investigate the Hecla you see why it does things that other furnaces can't do. It's the patented ideas of the Hecla that put it in a class by itself. We have explained these ideas very clearly in our

little book "Comfort and Health." To get a copy of this book you need merely drop us a card.

But if you want to go further, if you want us to help you figure out a heating plan for your home—a plan we will be responsible for—feel free to ask us. We have men here who can send you the best advice without cost. They will show you what to do—and exactly what it will cost. Write about it to-day.
