INVESTIGATION SHOWS WISDOM.

I make the absolute claim that Rob Roy Mining Shares are one of the least risky things you can invest in!

Strong language, as mining is usually classed as a speculation, and rightly so—if a lot of good common sense isn't used!

Still, I fearlessly say that these shares are safer than nine tenths of the monetary risks you daily run—in horses or cattle, for instance!

I have seen the properties, know the men at the head of affairs (well-known London men they are too!), have my own money up, and am prepared to give you the benefit of my experience if you want it!

You have \$100, say, that you want to invest if you can find a safe and profitable place for it. Well, there's nothing going that I know of better than Rob Roy stock at 15 per share!

If this interests you, and you mean business, drop me a line, and I'll gladly tell you what I know.

In any event, you don't have to buy. Altogether likely these shares will be taken off the market inside of a few weeks.
