

Valuable Book on Barn Building FREE

Write at once for this valuable book. It contains information that every farmer should have regarding the sanitary housing of dairy cows. It explains every fundamental of correct construction and gives proper dimensions and arrangements. It describes lighting, ventilation, stable floors, and their construction, and contains suggestions about silos, pits, exposures, appearance, design, drainage and inside equipment. Besides, you will find in this book a number of practical barn plans and other information that may point the way to your saving many a dollar. We have designed many of the finest and most modern dairy barns in this country and this book is based on our long experience and expert knowledge in dairy barn construction. The book contains in concise, clear and condensed form, information necessary to any farmer who is planning to build or remodel. Understand, we send you this book absolutely free without any obligation on your part—just for answering these few questions: Do you intend to build or remodel? How soon? How many cows have you? Will you want a litter carrier? Will you want a hay fork outfit? Send to-day.

BEATTY BROS. BOX A FERGUS, ONTARIO

This handy farm wagon is built low (which saves time and labor loading and unloading) and will carry the heaviest

load—anywhere a horse can travel. And because it never needs repairing, it's the most economical wagon on the market.

T-A Handy Farm Wagons & Wide-Tire Steel Wheels

Equip your old wagons with T-A Wide-Tire Steel Wheels and they'll be just as good as new. And besides they'll carry 25 to 50 per cent. heavier loads.

"Baker" Wind Engines

Are built for hard, steady work, and keep at it year in and year out.

It is the reputation which "BAKER" Wind Engines have fairly won and steadily held ever since their first appearance on the market, 30 years ago, that should be considered. They are famous for their durability, simplicity of construction and easy running. "BAKER" Wind Engines are so designed that the gears cannot wear out of mesh. The wheel is built on a hub revolved on a long stationary steel spindle, requiring no babbitting. It has a large number of small sails which develop the full power of the wind and enable them to pump in the lightest breezes. Has ball-bearing turn-table and self-regulating device, and all the working parts are covered with a cast shield, protecting same from ice and sleet. The above is only a few of the many features that have placed "BAKER" Mills in the lead. Let the H.-A. Co. agent give you complete information, or write direct for booklet. We make a full line of Steel Towers, Galvanized Steel Tanks, Pumps, Pneumatic Water Systems, Spray Pumps and Gas and Gasoline Engines.

Cross section of radiator showing fused joints.

HECLA FURNACE

**No Gas
No Dust**

FUSED JOINTS CANNOT LEAK

Comfortable heating is possible only with a Furnace that cannot leak gas and dust. At every joint where a leak might otherwise occur, the Hecla is sealed tight. We do not trust to bolts and cement. The wear due to constant expansion and contraction would grind out the cement and leave a series of leaks for the escape of gas or dust. To make a joint that will be as tight after years of service as it is when new, we fuse the steel sides and cast-iron frames of our radiators by a patent process. This welds the iron and steel into one piece.

Homes heated by Hecla Furnaces 20 years old are getting as pure air from the registers as when the Furnace was new.

And this Furnace saves one ten of coal in seven. Isn't it worth looking into?

WRITE FOR THIS BOOK.
If you want a more comfortable home, it will interest you.

All fumes from fire go through this passage. Every joint is fused making it gas and dust proof.

Burns wood as well as coal.
