IT PAYS TO BUY A GOOD SLING OUTFIT

- One that will not give trouble in the top of the barn where it is hard to get at.
- One that will stand up when heavily loaded.
- One that will not destroy the draft rope.
- One that will work with a large sized rope.
- One that will lift easily.

THE BT SLING CAR ALWAYS WORKS

It is the simplest in construction, no springs or complications to get out of order. Heavy car is carefully treated before leaving the factory. It is too beautiful to sling car and all parts are made of malleable. It is guaranteed to take off the largest load in two lifts. It never injures the rope and will work equally well with 1/2 inch, 3/4 inch or 1 inch rope. It has the largest draft wheel and puts the exact load in the draft rope of any sling car, and so lifts more easily.

Standard Wire Fence

The greatest improvement in wire fencing was made when we patented "The Tie That Binds." This binds on the running wire and locks fast on both sides. It is not driven down on the wires at the point of crossing, but at an angle—thus, it cannot injure the fence. The Tie is smooth—no ragged edges to cut animals or catch in hair or wool. Standardized Steel Fence Posts are No. 12 gauge steel that enable you to build a permanent lasting fence without posts. We can give you Improved Galvanized Tube Gates. If you are in the market for fencing, write us at once for our booklet and samples. They'll prove a lot of things that you ought to know about Wire Fence.
