

Class "PLB-2" Cross Compound, Power Driven Air Compressor, equipped with "Circo" Silent Leaf Inlet and Outlet Valves, Enclosed Dust-proof Frames and Splash and Flood Lubrication System.

Compressors for all Industrial Purposes

Straight-Line
Duplex
Single Stage
Multi-Stage
Low Pressure
High Pressure
Steam Driven
Motor Driven
Belt Driven

ADVANTAGES:

Automatic Splash Lubrication, insuring perfect oiling at all speeds, and a supply graduated to the exact needs of the machine.

"CIRCO" Leaf Valves, silent, efficient and easy to maintain.

Enclosed Dust-proof Construction, insuring cleanliness, preventing the escape of oil, and keeping grit from working parts.

Easy Accessibility to all parts for inspection and adjustment.

Simplicity of Design, keeping the number of separate parts at the minimum, making installation speedy and maintenance easy.

Machines of the type shown above are made in five sizes, ranging from 732 to 2032 cubic feet displacement for air pressures of 80 to 100 lbs. Several of each size are under construction in our works at all times, and early deliveries can therefore be made. Let our nearest branch know your requirements and prices and specifications will be promptly submitted.
