TESTED RECIPES.

Angel Pudding.—One pound of Eng-Angel Pudding.—One pound of English walnuts, seven ounces of powdered sugar, three teaspoons baking powder, mixed with sugar, nine ounces dates, whites of five eggs, well beaten. Break walnuts fine and cut dates in small pieces, add sugar and whites of eggs last. Bake in moderate oven twenty to thirty minutes. Serve with whipped cream cream.

Currant Marmalade,-Six pounds of currant Marmalade.—Six pounds of currants, six oranges, one and one-half pounds seedless raisins, five rounds granulated sugar. Cut the oranges in fine pieces, being careful to remove the seeds. Mix fruit with sugar and cook forty minutes. Put in pint jars or jelly glasses

Hot Potato Salad.—Boil seven or eight polatoes and use before they are cold. Chop half an onion and put into a pan with enough water to cover the bottom. Season with pepper and salt, cooking until the water simmers; add threatablespoonfuls of butter, and when it is melted a tablespoonful of vinegar. Slice the potatoes and pour the dressing on them serving bot. them, serving hot.

Sponge Cake.-Sift one level measur sponge Cake.—Sitt one level measuring cup of flour four times on newspaper and set aside. Sift one and one-fourth cups of granulated sugar four times and set aside. Partly beat the whites of six eggs and add one-half teaspoon of cream of tartar and beat stiff, gradually beating in the sugar. gradually beating in the sugar. Cream the six yolks and beat in one teaspoon of vanilla and one-half teaspoon almond extract, gradually folding in the flour. Bake from thirty-five to forty minutes in a pan with chimney in a

Cracker Pudding.—One cup cracker crumbs, one pint milk, yolks of two eggs beaten with milk, one teaspoon sugar, one teaspoon lemon extract, three tablespoonfuls cocoanut; bake ten minutes, take out, put on top the whites of eggs beat in one cup sugar, one teaspoon lemon extract; keep in oven long lemon extract; enough to brown.

Tiptop Gingerbread. - One-half cup butter, one-half cup sugar, one-half cup molasses, one-half cup sour milk or cold water, one and one-half cups flour, two eggs, not beaten; one tablespoon ginger, one teaspoon soda. The secret of having it light and tender is in beating the soda and molasses together thoroughly and in not beating the eggs. the soda and molasses together thor-oughly and in not beating the eggs. Add molasses and soda before the flour.

Preserved Pears.—Pare the fruit with a silver knife and drop into a bowl of cold water to preserve the color. When all are pared, put into a pan of clear, cold water, and boil until almost tender.

Bath Towels.—When bound on the edges with firm tape they will not pull or strain along the sides as they otherwise would do.

Care of Silver.—Never let silver be near rubber of any kind, as it will mark. Make a syrup of the water in which the pears were boiled, allowing one pound of sugar to each half-pint of water. Drop the pears into the syrup and cook them slowly until they can be pierced with a silver fork. Put the fruit in hot jars and cover with the boiling syrup. Seal

Calla Lily Cakes.-Make an ordinary sponge cake; drop batter by spoonfuls on buttered, paper lined, tin pan. Allow room for cakes to expand slightly while baking. Put into slow oven, letting them baking. Put into slow oven, letting then just bake through; when baked too long the cakes will break when made into lilies. Fold cakes while hot into cornulities. Fold cakes with toothpicks or fastening with toothpicks string until quite cold. Remove strings

ess Birds:-Grind a pound of lean beef stew, together with one large onion, through meat grinder five times. Season with salt, pepper, a little ginger, pinch allspice, sprinkle of ground nut-meg. Pound well on both sides two meg. Pound well on both skies two thin slices of round steak, and cut as nearly as possible into three-inch squares. Sprinkle with salt and pepper and cover with thin strips of fat pork. Put a spoonful of the ground meat on each square, fold, and fasten edges together with toothpicks. Fry to a rich brown in hot butter and drippings; lift them out and edge it is four to make and stir in flour to make enough gravy, about two tablespoonfuls. Add hot stock, and, if necessary, some bot water. Put back birds, which should be covered by the gravy, and cook forty-five minutes. When ready to serve, pull out toolhpicks, arrange on hot platter, garnish with greens, and serve gravy

Fudge Cake.—One cup sugar; twothirds cup butter; three eggs, one cup milk, two and one-half cups flour, we heaping teaspoonfuls of baking powder, heaping teaspoonfuls of baking powder.

The value of a lact depends largely upon what it is you happen to be trying te prove.

One essential of success in this world one-quarter cup of chocolate, one-half cup of English walnuts, broken up coarsely; cream the butter and sugar together, add the cup of milk, and stir in lightly the flour, into which the baking powder has been sifted. Stir in the

FIRE INSURANCE RIDDLES

AN ENGLISH HOUSEHOLDER'S PRE-DICAMENT.

Writer in London Daily Mail Tells How Companies Treat the Insured

Remove from fire and heat until creamy. Pour over cake to depth of one-quarter inch.

USEFUL HINTS.

Remove Stopper from Bottle.—Take a thin piece of wire, loop it, and insert loop into bottle. Get the cork in the loop and you can draw it out easily.

Moth Preventives.—The essential oil of cloves, cedar, and cinnamon are sure preventives against moths or bugs.

Protect Quilt Edges.—Baste a width of calico or cheese cloth across the top of quilts, like a binding. When soiled rip off, wash, sew on again, and your quilts always look like new.

Stocking Saver.—Sew pieces of cloth inside the legs of children's stockings. Have the pieces extend well over the knee, as this will keep the knees from wearing out and also will serve as a firmer hold for the elastic.

Cretonne Bed Cover.—During the hot weather, when so much dust blows into the room, a cover of figured cretonne, made large enough to cover the bed and pillows, is useful. It can be of colors to

WHAT COMES OFF.

It is only when the fire has come and destroyed all his goods that the house-holder finds this out. Then, when he claims the £1,000 or whatever the sum may be on which he has paid his premiums, he is met, for the first time, by a démand for proof as to what goods were burnt and whether they were worth that sum.

worth that sum.

He is required to produce an inven-He is required to produce an inven-dory comprising every article, to give evidence of their value to show ac-counts and receipts concerning the articles he has bought, to prove that they are all his and not belonging to this servants or his friends, and then, his servants or his friends, and then, when he has done all this, he is told that he has not allowed for depreciation, and that 20 or 30 or even more per cent. must come off his claim on per cent. must co

A HEAVY LOSER.

The result is that, while fire insurance as at present arranged acts well enough on partial and inconsiderable lesses, when a total, or practically a total, loss occurs, the unfortunate acts and the mental trouble, such as complete destruction of his home brings dition to the mental trouble, such as complete destruction of his home brings on him, he is compelled within a very short time to render all these innumerable particulars, and eventually, to escape the anxieties and expense of a tawsuit, to accept practically what the insurance company determines to give him.

near rubber of any kind, as it will it badly.

Hanging Curtains.—To prevent curtains from tearing when putting on a rod, place a piece of thin cloth over the end of rod. The curtain will slip along smoothly, saving much time and patience.

Mend Broken Crockery.—When a plate or dish is broken in two, bind together or dish is broken in two, bind together the patience of soft cloth, cover with the patience of soft cloth over the patience of Mend Broken Crockery.—When a plate or dish is broken in two, bind together with strips of soft cloth, cover with skim milk and boil four hours. It will be as good as new, and can be used in either hot or cold water ever after.

Burglar-Proof Window Fastener.—Where the sash of the upper and lower windows meet, drill a hole with a brace and bit deep enough to go completely through the sash of the lower window and half way through the sash of the

That is say, on a total loss we want a "valued policy"—a policy which val-ues our goods (after inspection by the tompany) at a fixed sum, and gives us a right to that sum on the proof of the loss.

At present one loses heavily under At present one loses nearly under the most unsatisfactory system in vegue, and as there is nothing like a toncrete case to illustrate the working of a system, I will give my own un-fortunate experience of my heavy loss by fire, although I had thought I was fully insured against its risks.

CASE IN POINT.

Some fifteen years ago I insured my furniture for the sum of £1,200, and ever since then I had paid the annual premium proportionate to that amount. Six months since a fire broke out in the middle of the night, and practically all my furniture and effects were de-stroyed before the local fire brigade had got the fire under what they called "control." Thereupon I sent in my ciaim for £1,200, with such general details as I could compile within the forthight allowed to me by the terms of the

Then the trouble began. I was retuired by the company to set out each erticle that I had lost, to place against It its value at the time of the fire, and to produce accounts and vouchers connection with these articles. men is that they are not absolutely mensible for me to do any of these essential to this world.

ers, we had practically none. A stray invoice or two, some twenty or thirty receipts not showing clearly the particular article to which they appliedwere all that we had possessed, and these had disappeared in the fire which had overwhelmed our home.

DEDUCTIONS MADE.

The upshot of the whole matter was that the company assumed there was £1,000 worth of goods in the house, tieclined to pay for engravings and prints (some of which were worth £5 and £10 apiece) because they had not been expressly mentioned in the policy; for the same reason would not pay for two pianos; disclaimed responsibility for several valuable family portraits in cils, on the ground that they were not absolutely mine, but were held in trust; held that the damage in my study, where I kept guns, fishing-rods, some sworting trophies, and a number of books and pictures, was caused not by the fire, but by the explosion of a case of cartridges I kept in that room, and therefore was not covered by the policy; tieducted 20 per cent. for general deprectation, while allowing nothing for the appreciation of some old Georgian silver plate; and finalls offecred me £750, or the alternative of an expensive and unsalisfactory arbitration (the terms of the policy denying me the right to blace my case before a judge and jury). of the policy denying me the right to place my case before a judge and jury).

"VALUED POLICY."

That, in brief, is the story of my fire insurance, and it must be the experience of many persons after an overwhelming fire. Some companies are whelming fire. Some companies are undoubtedly more generous than others; but I maintain that the system is wrong, and that what we pay for we should be entitled to get; that the policy should be a "valued policy"—in other words, if £1,000 worth of goods is paid for and is lost, £1,000, and no other sum, should be payable to the loser.

ANXIOUS MOMENTS.

Thousands of Little Ones Die During the Summer Months.

Every mother of small children knows how fatal are the summer months. Dysentery, diarrhoea, chol-era infantum and slomach troubles are alarmingly frequent at this time and two often a precious little life is lost after only a few hours' illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of Baby's Own Tablets prevents stomach and bowel troubles, or if the trouble connect of the same of the s trouble comes unawares the Tablets will bring the little one through safely. Mrs. Geo. Robb, Aubrey, Que., says:"I have used Baby's Own Tablets for stomach and bowel troubles with the lest results. I feel quite safe when I have the Tablets in the house." Sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medi-cine Co., Brockville, Ont.

A DEMORALIZED PLANET.

(By A. Banker.) Is the axis of the globe suddenly altering its position; or has this poor old

earth of ours become utterly demora-lized? We know that the "precession of the equinoxes" greately changes the climate of certain portions of our plan-et, but that is an extremely slow movement requiring more than twenty-five thousand years to complete an entire cycle. But in the Northern Hemisphere a most strange variation in the climatic condition of a considerable portion of the earth's surface has of late occurred, involving a complete reversal of the or-dinary state of affairs.

dinary state of affairs.

For instance, during the intensely cold weather of the past winter in Southern Europe and North Africa, the thermometer in Iceland registered as much as between fifty and sixty degrees biden then in the province of Venice: higher than in the province of Venice; and in the city of Venice itself it was impossible for a time to perform any funerals as the canals were frozen hard and gondolas could not be rowed to the cometery. And in Constantine, an inland town in North Africa, many of the palms and other subtropical trees were apparently killed by the frost, while the snow which had fallen there while the snow which had fallen there was described as having been nearly a yard deep. This, however, was probably an exaggeration. All down the Riviera, that region of sun and genial warmth, too, it was at times intensely cold and inclement. And in England, at nearly the end of June, fires in the reoms were almost a necessity; while in Scotland it is recorded that heavy snow has fallen on some of the mountainty. snow has fallen on some of the mountains; although at the same time at Tromsoe two hundred and fifty miles recth of the Arctic circle the weather was described as having been glorious and delightful, with the thermometer

and delignful, with the thermometer at seventy.

Or is the glacial period again approaching, and England instead of being a land of sylvan glades and shady groves, of heath-clad hills and flower-bedecked lanes and coombs, and of lovely fern-adorned glens and vales, once more to be ampulled in a shroud ence more to be manifed in a shroud of ice, every living creature driven from her dear and inhospitable shores, and for an eroch but

Salute to this world.

Your wife is a person who knows the difference between your character and your regulation.

It is mighty mean to send a penniless man a booklet descriptive of ideal places to spend the summer.

The best proof of the existence of a strong imagination in women is that they fall in love with men.

It must make a monkey mighty happy to hear certain people denying the Darwinian theory of evolution.

No man ever got very far if he kept thinking of the journey rather than the goal at the end thereof.

When you are making the excuse it sounds a lot more satisfactory than when some one is making it to you.

The person who knows the difference between your character and your regulation.

MODERN GIANTS.

Men and Women Who Were More Than Eight Feet in Height.

Marie Fassnauer, a Tyrolese woman, towers to the height of eight feet. But Marie, in spite of her many inches, is not the most exalted lady that ever lived. Just a quarter of a century ago the world gazed with craned head and open mouth at a still taller giantess who looked down on her admirers from a height of eight feet two inches and who was said to be "still growing."

"Marian," as this remarkable maiden was called, had been born only sixteen years earlier in a village near the Thuringian Mountains, and the "Amazon Princess" was for some months the greatest attraction in the spectacle of "Babil and Bijou" at the Alhambra Theatre, London—a character in which she wore a wonderful suit of armor and Marie Fassnauer, a Tyrolese woman,

the wore a wonderful suit of armor and crowned with a towering head-s, the topmost plume of which was was

Nor was Marian distinguished only by her great height, for she had a beautifully proportioned figure, a distinctively pretty face and a most amiable disposition. tion. This magnificent creature had a very brief tenure of life, for she died at Berlin less than two years later and before she had seen became the same than two years later and before she had seen became the same transfer than fore she had seen her eighteenth birth-

In 1869 and 1870 Miss H. Swan, the In 1869 and 1870 Miss H. Swan, the Nova Scotia giantess, caused considerable sensation. Miss Swan seemed destined from the cradle to be a woman of abnormal dimensions, for though her father, a Scottish immigrant, was barely five feet six inches and her mother was half a foot shorter still, Miss Anna reached six feet at the age of 11, and at 15 was the tallest person in Nova Scotia. For a time she was the chief attraction of Barnum's great show, and during this For a time she was the chief attraction of Barnum's great show, and during this period twice narrowly escaped death from fire. She had, too, some histrionic ability, as was proved when she arpeared as Lady Macbeth in New York, and before going to England she made a and before going to England she made a triumphal tour of the United States.

In her prime Miss Swan was but a few inches short of eight feet, and she found an appropriate husband in Capt. Martin Bates, the Kentucky giant, who was actually two inches tailer than herself.

Chang the Chinese giant who ended his days at Bournemouth, England, not many years ago, was a man of enormous size, standing over eight feet in his socks, but he used to declare that he had a sister at home in China who could had a sister at home in China who could easily look over his head. This remarkable lady was eight feet four inches in height and had a hand with a span of

two feet.

Robert Hales, the Norfolk glant who caused a great sensation in England about half a century ago, was a member of a very remarkable family, which ber of a very remarkable family, which included some women of extraordinary stature. His father, a farmer, was six feet six inches high, and although his mother was but a paltry six feet, it is said that she had an ancestor in the six and the sections who allowed few tests. teenth century who stood four inches over eight feet.

over eight feet.

Of the children of this couple the four sons averaged six feet five inches, and five daughters but one and one-half inches less. Robert, the tallest member of the family, was a little over seven and one-half feet high, and measured sixty-fur, inches and sixty-fur, inches sixty-four inches and six y-two inches around the waist and chest, respectively, while the tallest of the sisters, who died at 20, was seven feet two inch height and of proportionate build. inches in

The number of deaths occurring The number of deaths occurring among young children during the summer months is simply appalling. In the city of Montreal last week, 175 the city of Montreal last week, 175 children under the age of five years due to stomach and bowel troubles. With ordinary care most of these little lives might have been saved. Watch the food given the little ones. Do not feed meats; see that the milk given is pure, and give an occasional dose of Baby's Own Tablets, a medicine which surpasses all others in preventing and curing stomach and bowel trouble

SUSPICIOUS.

"I guess Mr. Roxley ain't as rich as some people think," said Tommy. "You said he didn't have to work; but could jest go 'round enjoyin' hisself wherever

'So he kin," said Jimmy. "Well, he wasn't at that dandy Sun-day school ricnic of ours yesterday, an' the tickets wuz only 25 cents."

AWFUL WARNING.

Pa: "Yes, my son; the Egyptians were the most intellectual people on the
