EXTRA LATERAL RIGHTS.

the British Columbia legislature was the abolition of the apex law with its extralateral rights. Extra-lateral rights still inure to the claims taken up before the law was passed There was an example o the evil effects of this law in the litigation over the matter of the apex of during his stay in Rossland on his way ledge. Now the ledges in the Minertween companies operating lode mines
in this province. Happily the number a vein which arose between the Centre tween companies operating lode mines in this province. Happily the number of claims taken up under the old law, and to which extra-lateral rights are attached, is not very large. A glance at the companies operating lode mines in this province. Happily the number of claims taken up under the old law, and to which extra-lateral rights are attached, is not very large. A glance at the companies operating lode mines in the smelter was proving a great sides and the Knob Hill were very large. Had the offender been a white man he from the Boundary to Spokane. He said Graves syndicate mines, the Old Iron-that the smelter was proving a great sides and the Knob Hill were very large. Would have been sent to jail without that the smelter was proving a great sides and the Knob Hill were very large. Would have been and would have been duly tried for success, and was fulfilling all the anticity of the fact that Mr. S. H. did not claim that the whole ledge offense, and if found guilty he would the success and was fulfilling all the anticity of the fact that Mr. S. H. did not claim that the whole ledge offense, and if found guilty he would the smelter was proving a great sides and the Knob Hill were very large. When any more," but it may be a very large sides and the Knob Hill were very large. When any more, and it is may be a very large. The said of the smeller was proving a great would have been sent to jail without that the smelter was proving a great would have been at least the smelter was proving a great would have been sent to jail without that the smelter was proving a great would have been at least the smelter was proving a great would have been at least the smelter was proving a great would have been sent to jail without that the smelter was proving a great would have been sent to jail without that the smelter was proving a great would have been sent to jail without that the smelter was proving a great would have been sent to jail without that the smelter was proving a great would have been sent to jail without that th the mining map of the Trail Creek division will show this. The square claims
are those taken up under the new law,
while the parallelograms are those which while the parallelograms are those which been closed by the act; the country is prophets in mental gifts lived and were staked when the law gave the lowners of claims extra-ateral rights. The law properties the real arbiwas obnoxious because it led to a great deal of useless and costly litigation, and the victory is given as nearly as possideal of useless and costly litigation, and the victory is given as nearly as possible to the right instead of the strong, lable mining properties were often and a content of the concentration of weeth as the concentration of the concentration of the concentration of weeth as the concentration of the concentr table mining properties were often robted of the fruits of their toil and investment by consciousless but stronger comment by consciousless but stronger companies, who employed hordes or experts to sustain their contentions. At least their glory and their achievements. Unand it is regarded there by many as a law under which spoilation is carried on any of the extreme should might not care to go to the extreme and as a rene of barbarism. The Mining and Scientific Press, in speaking of the law, says: "The apex law, with its extra-law, says: "The apex law, s law, says: "The apex law, with its extralateral rights and all the ills of litigation conditions as they prevail in Canada, that follow in its train, is a legacy of and which would prevent strikes, could the old Spanish rule. It was a Spanish be adopted to the advantage of the en-
