A sad event occurred here last Thursday evening. About eight o'clock Mrs. John Coldwell seeing her father-in-law, Mr. Jonathan Coldwell, went to his room thinking he was there. Not finding him in the house she looked in the barn and house cellar. Her husband being away she thought he had gone to the pasture for the cows so with a lantern she searched the pasture for an hour. After nine o'clock she went to a neighbor for help. Two men searched the pasture and found him just below the barn lying down as in the attitude of sleep. Dr. Bowles of Wolfville was immediately called who pronounced him quite dead. Mr. Coldwell had not been well for a week but was as well as usual that day. He was highly respected by all who knew him and his sudden death has cast a gloom over the whole community. His wife and family have our deepest sympathies in their affliction.

DOES IT PAY TO OWN A THOUSAND SHARES OF STOCK

Many people seem to think that a thousand shares of stock is only a small amount to hold, but a thousand shares of some of the copper mining companies would mean an immense fortune. One thousand shares of Tamarack would mean an income of six thousand dollars per year, Calumet and Hecla over thirty thousand dollars per year, Alaska Treadwell, one thousand five hundred dollars per year, Boston and Montana, forty thousand dollars per year, while the profits on the advance of some of the oil stocks are just as phenomenal. The Black Mountain Oil Company at the beginning cost fifty dollars for a thousand shares, advanced to fifteen hundred dollars. The Fullerton Oil Company cost five hundred dollars, advanced to nineteen hundred. The Whittier Home Oil Company at two hundred and fifty dollars, advanced to twenty five hundred dollars. The Kern Oil Company at three hundred and fifty dollars, advanced to twelve thousand dollars. The Fome Oil Company at ten thousand dollars advanced to five hundred thousand dollars.

The time to invest in any enterprise is at the commencement not after it has arrived at the dividend-paying stage, although it is very difficult to make a great many buyers understand this. The mistake most people make is waiting for a dead sure thing. In this connection, our representative introduced the firm of Messrs Fox & Ross who are probably the best and most widely known brokerage firm in Eastern Canada, and who have been appointed local brokers for the Ontario and California Oil Company, Limited, non personal liability, whose advertisement appears in another column of this issue, and they stated that they had thoroughly investigated the merits of this Company and believe that it is the best money maker that has ever been placed before Canadian buyers. Their Ontario properties alone made it an investment and not a speculation. The prospectus which is issued is certainly a business like one, and it would be well for those thinking of investing to send for one and judge for themselves. H. O. A.

Balsam Advertised

How old do you suppose the art of advertising is? Never given it a thought, eh? Would you be surprised to learn that advertising is considerable older than printing? Well, it is—older than the Bible itself. In fact, take the Bible out of your bookcase and turn to Numbers xxiv. 14, and harken unto Balsam, who saith, "Come, therefore, and I will advertise." Even Balsam had ideas tinted with progressiveness.
