Too Fine a County To Be Without an Agency To Make Its Advantages Known

Western Ontario Editors Are Lining Up In Big "Stay in Ontario" Campaign

Press of the District Throwing Its Weight With The Advertiser's Efforts to Restrain Tide of Emigration From Banner Counties.

APPRECIATED BY THE EXPRESS,

The Ay'mer Express says: The London Advertiser is doing good work, in that, while allowing that the west is great, it shows that Ontario is in no way behind it, and is ably supporting the parties in Kent who are putting up small holdings for fruit and vegetable raising.

FOUND THE BEST METHOD.

Sim Brothers, publishers of the Rodney Mercury, have written The Advertiser as follows: "Let us congratulate you on the interest which your articles are awakening all over Western Ontario, and we may add that the people of the western counties owe you a debt of gratitude for having found the test method of proving to the young men and women of Ontario the wonderfully rich heritage which surrounds them in that strip of country between the Niagara and Detriot rivers, a district that for climate, productiveress of soil, variety of agricultural and horticultural access to markets and possessing the conveniences of modern civilization cannot be surpassed anywhere in the world-a twentieth century Eden where every prospect pleases and man is not vile but is the highest type Let the good work go on.'

"DOING A LONG-NEGLECTED WORK."

The Clinton New Era of a recent date says: "The London Advertiser is doing a long-neglected work by pioneering a splendid "Stay in Ontario" campaign. It is simply wonderful what our possessions are when attention as called specially to them. times has been 'Westward! forever westward!' and as a result of it this and other provinces have suffered heavy depletion of both population and dollars and cents. Many who went west have done well and the door is still wide open, but while this is true all the green fields are not in the three westerly provinces and British Columbia. We do not depreciate the great wheat fields and the broad acres, but we think this is an opportune been great and its people not industrious and level-headed, would have suf fered very much more seriously by the long continued draft made upon it New life is being instilled into the products of the orchard, vegetable growing is taking a rank it never had before, and our American cousins, gen erally on the alert for number one, are seeking the purchase of thousands of acres of good Ontario soil and are not bantering about the price. Are we awake to the fact that Ontario is the land flowing with milk and honey? There is no barrier in the way of the modern farmer increasing the returns of his estate one bushel to the acre by better cultivation and the choice of the best seed. This in itself would amount to thousands of dollars in the regular routine of work. The market is open to every growable commodity and at prices that insure a good reward for the labor, and our cheese factories and creameries are still recognized as competent to produce the best land down in Elgin county which is the customer can purchase. With a prospect of a new interest being taken no better in any way than some of in northerly Ontario, an awakening of the older sections of this province is the sandy loam lands almost within also at hand, and by it we hope to record such a development as has never teen known in our history. A few people cannot accomplish this, but by the hearty co-operation of everybody it may be easily attained. "Stay by Crtario" is the watchword, and the New Era misjudges the residents of Huron county and the other counties if the financial results would not be the biggest surprise yet experienced. If you will put your ear to the ground you will already hear the trend of this forward march.

EMIGRATION HAS GONE FAR ENOUGH

Extracts from an editorial in the Glencoe Transcript with the heading to do much good. It a sympathetic, "Stay in Ontario" are as follows: 'The thought is beginning to take shape in Ontario minds that this westward trek of our farm population has gone about for enough. Many circum-

stances combine to strengthen the thought into a conviction. "In the first place we hear every little while of land purchases made in the try as a man may wish for. best counties of the peninsula by American investors. If outsiders, looking unbiased over the Canadian field, prefer Ontario for settlement and cultivation, anxiety to clear out, sell it to them 'dirt cheap.'

the American is worth while to the Ontario man. "It is not necessary to speak of the notable advantages of soil and climate is beyond dispute. The success of possessed in a unique degree by Ontario. There are sentimental reasons also the Farmers' Advocate's experiments, why the Ontario man should stand by his own province. It gave him his edu- and the results achieved by independcation, not only in school, but, more important even, it has breathed a thou- ent growers who have applied sciensand influences into his being, of field and stream, of church and home training. He owes much for all this. Should be turn his back and leave the land chards, proves beyond dispute that at the first opportunity? The rush for quick wealth carries many men from in this case of fruit culture Middlethe safe moorings and makes their life a wreck. Stay in Ontario and keep sex county can be excelled by none.

the affections whole is good advice to many a young man. "But the economic considerations are equally potent. it is true that the and British Columbia, and a good defeat of reciprocity has deprived Ontario of what would have been a great sale for them is found in London

Editor Urges Kent to Spend \$15,000 in Advertising Resources

Movement Assumes a General Aspect and Reawaken ing Leaven Begins to Spread Through the Whole Loaf.

DISCOURAGING "TREK TO THE WEST."

The Thamesville Herald has taken up the "Stay in Ontario" cry and with the heading "Booming the Western Peninsula" prints the following: This spring old Ontario is again witnessing the discouraging spectacle of hundreds of its farmers leaving for the west. This migration is not confined to young men, but, as aptly stated by our Wabash correspondent last week, many of the best farmers are leaving good farms in Ontario to seek their

This problem is becoming serious. The Dominion Government has spent hundreds of thousands of dollars in advertising Canada and assisting emigration, but we are bound to confess that so far old Ontario has not of Mr. A. J. Morgan, whose business received the benefit that it should from this enormous expenditure. good portion of the emigration of the last decade has stayed in Ontario, but they are city dwellers and have not gone to the rural sections. majority of the newcomers suited to agricutural work go west.

While the population of Ontario may have increased during the last ten years, there are portions of it where the population has decreased, and we think we are safe in saying that this western peninsula is one. Every year we see a number of our best men succumbing to the lure of the west, selling out here and journying westward to build themselves a home on the great

What is to be done?

Let us do what the west has been doing persistently, boost and advertise. Think of the enormous amount of money which the west is itself spend-

ing every year to make its opportunities known to the world. Why cannot we do the same. Here in this western peninsula we have land peculiarly adapted to growing tebacco, corn, fruit and garden truck. In the counties of Kent and Essex we have soil and climate conditions that other counties have not. We have opportunities just as good as the west A man can grow stuff for the canning factories that are springing up all around us; he can grow tobacco and he can grow iruit. He can with industry and thrift, build for himself a comfortable home in this part of old Ontario as good as any man wants, even though on the start his earthly

porsessions be few. What Essex needs is an advertising campaign. Not a small penny wise and pound foolish affair, whereby the county councils vote a few hundred dollars or so, but a real, live, forceful campaign. Something that will stir things up and let people know that we are on the map. An expert should be hired to take charge of it. The county councils should expend a few thousand dot-Chatham and Windsor should spend a few thousand, and every tewn, village and township contribute according to their assessment. By this

means ten or fifteen thousand dollars could be raised. What changes could be wrought in this way. Advertising could be done in the old country which would have the effect of bringing to this peninsula the class of small farmer and market gardener that we need. With united effort great things could be accomplished. In five years our population could be doubled, and the rosy picture which Editor Bowyer drew in the Ridgetown Dominion a few weeks ago of the myriads of market gardens and network of electric roads would become a pleasant reality.

Since the above article was "set up" we see by the papers that the Essex cevnell has got busy. The dispatch says: "The plan of the committee is to of eggs this year as during 1910 and issue advertising matter, probably in the shape of a pamphlet, setting forth 1911. While there are but very few the advantages of Essex county as a tobacco district, for the cultivation of peaches, grapes and small fruits, for truck gardening and the growth of rad- thing like a large scale, there is ishes and melons, as a centre for corn and hogs, hay and cats, and in fact to large publish a booklet that will be representative in every way of all the various people who are finding it profitable The committee will seek the co-operation of towns to produce fancy eggs as a side line. interests in the county. and villages, so as to make the publicity campaign as broad and as effective Hand in hand with this there is an

Shortage in Small Fruits. "There is plenty of acreage within easy driving distance of the London market vilich is available for growing strawberries and small fruits, yet there is always a shortage in both these products. Any householder knows that it is necessary to get on the market early in the morning if one expects to get a supply of good fruit for the dinner table. berries which have been driven in all the vay from Arkona are eagerly

Twenty-Acre Farms the Thing. Mr. Thomas C. Knott, of Knott & Sangster, was of much the same opinion as Mr Anderson "When people go in more for intensive farming and some of the present large farms are split up into 20-acre plots, there is bound to be a big boom in land values. It is ridiculous that we should import apples from Oregon and British Columbia, for I know that the land in those places is no better and the climate little more suitable for apple growing than our own. The fruit may be better colored than ours, for they have the advantage of more sunlight, but in flavor the home pronot find a profitable market for their duct far surpasses the imported apples. This is largely true, but the article. It is only a question of increason is not hard to find. Most of telligent care."

PLAIN HENS EGGS WILL BE SOLD IN LARGE QUANTITIES

Poultry Dealer Says London Will Be Famous as Great Producing Centre.

London, world-famed as the home of blooded chickens, is destined to become as equally prominent as an eggproducing centre. That is the opinion True, a as a dealer in poultry supplies brings him into close touch with the poultrymen of this city and the district surrounding. There are many dozens of pedigreed eggs, worth many dollars a setting, shipped from London each year, but it is the common or breakfast table variety in which Mr. Morgan sees the future of the Middlesex poultry industry.

"There is a growing tendency among men interested in poultry to go into the business of producing stictly fresh eggs for the fancy trade," said Mr. Morgan to an Advertiser representative. "People are beginning to realize that they can get more for eggs stamped with the date on which they were laid, and carefully packed in pasteboard boxes than for the same article sold in relatively large quantities to commission men. People are willing to pay a little more for eggs which they know to be strictly fresh, and the man who establishes a repu tation for the excellency of his individual wares, and puts them up in an attractive package is the man who

gets the cream of the market. "Some idea of the increase in this class can be gained from the fact that we have sold twenty times as many dating stamps for the labeling of eggs this year as during 1910 and chicken ranches conducted on anyand increasing number of and go in for the producing of a strain dent to her rudder.

[From the Forest Free Press.] A GREAT BOOM FOR LAMBTON

Most Progressive County in Ontario.

In addition to the good work being cone by the Lambton Publicity Association by various towns in the county and by individual effort, the County Lambton has been, during the past two weeks, getting the benof a splendid series of articles in The London Advertisef. Arthur C. Bowman, of the editorial staff of that paper, has paid several visits to the county, and has written the articles from personal obser-

which will produce the highest possible number of eggs per hen per

"Shipments of live chicks are becoming common. People are beginning to buy day-old chickens in preference to hatching the eggs and taking chances of heavy losses through unsuccessful incubation and loss of fertility through low temperatures from oast to coast.'

Chances in the egg industry are shown by the fact that Canada this year imported something like 700,000 lozen from the United States, whereas our exports amounted to only 25,-

We Cordially Invite You to Our Display of New Spring Wall Papers

on screens, showing the different styles of decorations.

The great progress made in the production of Wall Papers this season has resulted in designs and color effects which far surpass anything brought forward in past years. The new floral effects are true to nature, and wonderfully duplicate the actual blossoms and foliage. The conventional designs are original and clever, and include endless new effects for library, hall, dining and other rooms. All the productions at this display have been most carefully selected, and embrace Wall Papers in great variety, suitable for every room in the house.

This is an opportunity which everyone interested in beautifying the home will welcome. A remarkable feature is the very reasonable prices placed on these goods. Values are greater than in any previous season. We carry a complete stock of Wall Papers from 5c to \$5.00 per roll, also BURLAPS, MOLDINGS, etc.
