**- Special Belt Pulleys -**

.... FOR ....  
**MOTORS and DYNAMOS**

OUR Special Dynamo Pulley has been on the market for a number of years, and its general adoption by electricians and manufacturers of generators is sufficient evidence of its merits and popularity.

WE CLAIM: Best belt transmission surface; reduces belt tension and journal friction to a minimum; runs nearly noiseless; extra strength (all made for double belt), will not "fly to pieces"; construction is of highest order. It more than "fills the bill."

This pulley was used with great success on Electric Motors and Dynamos at the World's Columbian Exposition, doing the heaviest service, and was the only Special Pulley recognized by an award.

We simply request a trial

In ordering, give net size of shaft and key-seat, and state length of hub desired, and where located in relation to the rim.
