THE LINDSAY BELT TRANSMITTER

Showing how the drive pulleys are mounted at the line shaft. When machine stops the dead pulley with belt is severed entirely from the shaft.
A large number in daily use, giving excellent results on all kinds of machinery and shafting where a cut-off system is required.
Dispels all loose pulley and clutch troubles.

TORONTO

Easy to Lay

THE first ready roofings, made some thirty years ago, lasted a very short time.

Then manufacturers improved the goods and smooth surfaced roofings of various kinds were developed that would endure fairly well if the top surface was given a coat of heavy waterproof paint every two years.

Now comes Amatite—with a mineral surface which requires no painting and which will last longer without painting than the other kind did with constant painting.

The top surface, being mineral, is unaffected by weather or climate. It really protects.

The waterproofing material in Amatite is pitch—the best resistant to water known. Water will in time dissolve or disintegrate almost anything, but it is powerless against pitch.

Roofings of twice the price often do not protect as well because they are not waterproofed with pitch.

Amatite is easy to lay—any one can do the work. We furnish you free nails and liquid cement for laps.

Investigate the cost of Amatite in your locality. You will be astonished at its low price.
