NOTES FROM OAK LAKE

August 23rd, 1905. For one who has visited the parish of Oak Lake and known what a small presbytery the parish priest has to live in, it is easy to understand that a large and spacious presbytery is a thing that ishioners. Yes, when the cold Sundays has long been wanted. Of course, there are plenty of presbyteries worse than this one in the diocese, but, more's the enough for our Manitoba winters, close enough in summer and too small for any parish. Ask the house-keeper how they managed to cook in a kitchen 8 by 13. Ask the big St. Bernard dog if his tail. Ask Mrs. B. . . if many people can stand in the office with her. If all these answer as requested, one can and the greater glory of God that Rev. Father Bouillon and several others spent many years in such a house.

And now it would not be out of place to give a description of the building which is under construction, for it is not easy to know how substantial a house is when it is completed. Who knows but what the work which is thus hidden from view is improperly done? But men of experience tell us now that it will be solid and that it will be warm. After having suffered for three winters Father Bouillon undertakes the construction of a substantial building which parish priest. We would perhaps be future presbytery will not have its equal in the whole diocese. And we will not say anything of our cure's hailed out. capacity as an architect, because we know very little of architecture. But we judge by what we see, and if we listen to our common sense we can safely say that what is now none, is well done, and that it was worth doing and that it is done not only for to-morrow, but for all time to come. It would be well if a few farmers and business Mr. Dupuys, from St. Jean Baptiste, are men who have erected many work will not be half done.

will find there a water-proof cellar, 30 by 26, the like of which cannot be found in Oak Lake. Cement walls 7 feet high, cement floor, furnace room, coal bin vegetable bin, an ice pantry which communicates with the kitchen, and a commodious waiting room for the parcome and the people come in before Mass to chat in this warm waiting room, with its imitation marble floor, they will pity. We know that the house is cold appreciate Father Bouillon's original ideas. If the rest of the building is to be as beautiful as this floor, we can expect something first-class. "A thing of beauty is a joy forever." The first floor, 30 by 36, comprises a large kitchen there is much room in the house to wag which will have all modorn commodities pump, pantries, etc. The office will be on the southwest, facing the town and main roads; on the east of the house we say that it was only for the love of souls | shall have the parlor and dining room, two rooms which can be converted into a large dining room on special occasions; also the housekeeper's room. The upper part comprises four large bed rooms. with a bath and toilet room. The roof is to be a cottage roof, to which an easy access can be had for taking photographs of the surrounding farms. The outside walls will be made of white brick. We are all confident that before very long Oak Lake will have reason to be proud of a fine presbytery, and that other Catholics will try and settle in our parish, which is just beginning to flourish. If they come they will find some will answer all the requirements of a splendid wheat and hay lands within easy reach of a town which has plenty saying too much if we said that for of elevators ad stores, as well as one of solidity and modern conveniences the the best flour mills in the province. The crops are excellent this year, and not one of the parishioners has been

A GREAT MISSIONARY FIELD

We wonder why our Protestant friends cast such yearning eyes at the million of people in Catholic lands who best to relieve Mrs. J. Withom of have never heard of the prayer meeting asthma; none succeeded. 'For years, men would copy from Father Bouillon. or the chicken social (but who still are she states, 'I was a dreadful sufferer; They would learn that it never pays to worshiping God and serving Christ as nothing gave relief. At times I found poor material, and that it is always the Catholic Church teaches them) it necessary to have all the doors a gain to employ experienced and hon- when city and country here in America windows open to get my breath. ant missionary work.

the hatch at the northeast corner, we ican metropolis 1.087,762 Protestants guaranteed.

The James Smart Mfg. Co. Limited,

Western Offices and Warerooms:

The communicants of the 951 Protestant churches in the greater City are given as 331,698, so that for every communicant there are over three persons, nominally Protestant, but with no church connection. There is another large class, given by the Federation as numbering 497,547 who are in affiliation with the Protestant churches but are not communicants, so that out of a total Protestant population of 1,917. 007 considerably less than half or 829,245, are church adherents. The New York Federation points out that the churchless Protestants of New York outnumber the whole population of Nebraska, and says that the Protestant bodies should recognize the fact that New York presents the greatest home missionary field in the country.

Forsaking the heathen at home, while pursuing the Catholic abroad (already a better Christian than himself), never seems to strike the Protestant missionary to Catholic countries as absurdly inconsistent .-- Sacred Heart Review.

WASN'T SURPRISED

Through oceans of remnants and ribbons the puffing, big woman towed the meek little man.

"What in the world shall I send her, John?" she blustered. 'Come, suggest something that would please Aunt Betsy. Something cheap.

"Stationery, books, or workboxes," suggested the meek little man.

"Nothing of the kind! I will look at some of those fancy boxes of soap."

They were before the fancy counter, and she had her finger on an elaborate box containing six round cakes of white soap.

"Fancy and perfumed!" she said, lifting a cake. "The very thing that would please her the most. You may wrap that up miss!"

"But my dear--" protested the

"You just keep quiet; I don't care for any suggestion from a person without taste."

"Really--"Be quiet, John!"

The little man shrank away in mor-

"Well, John," asked she a few days ater, "what did Aunt Betsy say about the little gift? Something nice, I know.

"She returned it." "What?"

"Yes; you will find a note in the box." She unfolded the missive and read:

Niece,-I return the box of shaving soap. I am a little too old to appreciate the joke of being regarded as the Bearded Lady.

CONSIDER WELL HOW YOUR HOUSE IS TO BE WARMED.—Super-heated air is pernicious to good health, depressing in its effect and renders its victims particularly susceptible to out of door exposure. A pure, mild, artificial warm air can only be produced by passing a volume of pure, fresh air over a radiating surface that is not super-heated, as in the case with "Kelsey" Warm Air Congretors. All Correspondence for our various schools is inducted from the Executive Office, Cincinnati, O. Patrons will confer a favor on the publishers of the "Review" by mentioning its name when they call upon the advertisers

BROCKVILLE, ONT.

WARM AIR

GENERATORS

Positively Heat Rooms Distantly located or on a level with the Generator.

The wonderful results obtained in conveying to every part of the largest houses an abundant supply of the purest quality of air, warmed to just the right temperature, makes the "Kelsey" the most desirable heating apparatus made.

"Kelsey" Record

3 Only made and sold in 1889. 26,000 in successful operation in 1904. More than 2,500 in use in its home city, Syracuse, N.Y.

Pleased "Kelsey" Users in some 500 Canadian towns, extending from the Atlantic to the Pacific.

50 p.c. of an increase in sales in Canada for 1904 as compared with 1903.

Sales in both the United States and Canada have very largely increased each and every year since arst introduced.

Being used for the Proper and Economical warming and ventilating of a very large number of schools, churches and other public buildings.

This exceptional record must be due entirely to merit as the "KELSEY" is not in the "How Cheap!" class.
