HAMILTON HARROW.

This is the most complete and perfect Harrow made. It has no equal in reliability and effectiveness. It is so simple in construction that it can be set up after the Tongue is attached to the main plank without a wrench.

The Discs are placed one slightly behind the other, bringing the two inside Discs close together. By this arrangement there is no part of the ground left unworked, as in other harrows. The Hamilton has many other special features, for particulars of which write to
