General Strike To Be Called in Places Where Government Takes Away Control From Reactionary Forces-Thousands of Workers Under Arms.

Chemnitz, Saxony, March 27 .- Communists are firmly intrenched in control here and prepared to resist attacks by government troops, which may be sent against the city. In the event the troops secure control, a general strike may again be called. TOWNS AND CITIES IN LOWER SAXONY IN WORKERS' HANDS

Falkenstehyn, Saxony, March 27.—
(By the Associated Press).—Workers have taken over control in towns and cities of Lower Saxony, but there is an impression their ascendancy will be short-lived, as they are not sufficiently organized in a military way to resist pressure successfully. The principal task of the workers is policing the town.

One hundred workers, under the direction of Hoelz, entered Plauen in motor lorries and kidnapped City Attorney Hubert and held him as a hostage until he had given up data he had gathered for the prosecution of trade unionists and Communists accused of political agitation.

He was released after he had been a prisoner for several hours.
Hoelz has established headquarters in the castie of Freiherr Falkenstein, if the data waves from the tower.

"The time is not ripe for the establishment of a Soviet form of government." he said in an interview with correspondents. The agriculturists would not approve of it, and we would be quickly starved out. We recognize the absolute helplessness of workers in case of armed conflict, and we will again call a general strike."
