

# Cobalt-- Public Enter Market in Force-- Cobalt and Prices Begin to Soar.

## One of Busiest Days in Years Mining Stocks Boiling Merrily

Cobalts Traded in on Extensive Scale and March Upward is Kept Going--Advances Thruout Whole List.

World Edition.  
Thursday Evening, Sept. 1.  
The new month opened auspiciously on the local mining markets, the list of securities displaying an all round buoyancy and several good advances being made.

The exchanges bore a somewhat similar appearance to that in evidence during the palmy days of 1907-8, when the big boom was on, trading for the day being on a very large scale, the total sales on the Standard Exchange alone being nearly 250,000 shares.

New record prices for the present movement were realized by nearly all the cheaper issues, advances of from one to four points being general throughout the list.

Peterson Lake was one of the most active stocks, selling up 2 3/8 points to 27 3/8. There was an excellent demand for these shares, the public having become convinced that their mining movement was well advanced, and that the higher priced securities were practically neglected, speculative interest being concentrated in the cheaper issues.

Forward the close the demand for stocks eased off, and values were below the high for the day when profit-taking came into the market, but offerings were well taken care of, and no material weakening occurred.

There is a growing opinion among local stock market followers that the movement in the Cobalts is just beginning, and with the market in its present status it is impossible to see how values can be held back if the present buying continues.

### PRICE OF SILVER.

Bar silver in New York, 82 1/2 cts.  
Bar silver in London, 24 1/2 cts.  
Mexican dollars, 44c.
