31	Wed	Moon eclipsed—invisible.	5 43	6 18	4	5 28		2

From March 4th, 1789, to June 30th, 1844, the United States government expended on the War Department six hundred and sixty-three million, four hundred and thirty-eight thousand, eight hundred and fifty-one dollars. The interest of this sum, at six per cent, would build Whitney's great railroad from the lakes to the Pacific, of 2500 miles in length, at fifteen thousand dollars per mile; and thus erect a highway for the commerce and communion of the family of nations, which should be reckoned in all coming time as one of the greatest enterprises that ever blessed the race.

Calicoes were first printed in London in 1676.

The quantity of Lead shipped from Galena in 1844 was about 43,000,000 pounds. This year it is estimated that the amount will be 60,000,000 pounds.
